SEEDS

"As Good as Grow for You to Sow"

Salmon Tinted Pollock, No. 10-25 Cantaloupe

From **D. V. BURRELL**
Seed Grower

ROCKY FORD :: COLORADO

**The Mountain States Most
Extensive Seed Gardens**

Thousands of the Most Successful Planters of
the United States Plant These Seeds Each Year

Rocky Ford, Colorado, Dec. 1, 1920.

To My Customers and Friends—

Our country is now engaged in the great reorganization movement to which we have all looked forward with question as to the result.

These times call for careful, sober thoughts and for all to keep busy. A full day's labor, careful purchases, and less extravagance will be of great benefit.

The main thing is what you do.

Beautiful buildings, comfortable homes, well tilled farms and gardens, efficient factory equipments, abundant products, all depend upon the intelligent and industrious application of labor. All we have is stored up labor and the time wasted in the U. S. if properly applied would produce an abundance of both the necessities and luxuries of life for all.

Back of these things are seeds. The great questions, "What shall we eat?" and "How shall we clothe ourselves?" are answered by this: Labor intelligently and diligently and plant good seeds.

It is a pleasure that we can have a part in this work.

I thank you for the large number of orders received this past year and hope you were pleased with the results and that I merit your orders again.

I will do my best to please you.

Yours truly,

D. V. BURRELL, Seed Grower.

INSTRUCTIONS TO PURCHASERS

Please follow these instructions carefully. If any mistakes occur or your order is delayed, let me hear from you promptly.

MY TERMS ARE CASH WITH ORDER.—Send Postoffice or Express Money Order, Bank Draft or Registered Letter. Small amounts may be in postage stamps.

C. O. D.—No goods shipped C. O. D.—Under the new telegraph rulings you can wire the money with the order where it is necessary to send wire orders, which does not make it necessary to send C. O. D., as used to be the case.

HOW TO ORDER.—Always write your name, postoffice, state and express office plainly, and if possible use the order sheet. Always carry out the price of each item.

Make all orders or checks payable to D. V. BURRELL.

SAFE ARRIVAL GUARANTEE.—I guarantee safe arrival of all seeds sent by Mail or Express, but request all to have their addresses plainly written. If the seeds are not received in a reasonable time, send an exact copy of the order and state kind of remittance and same will be given immediate attention.

HOW TO SHIP.—Always state how to ship heavy seeds, if to go by Freight or Express.

GUARANTEE.—It is impractical to guarantee seeds, as under improper care the best of seeds will fail. Some may be sown too shallow or too deep, in too dry ground or too wet. Some hardy seeds will stand cool weather and grow when soil is too cold for others and will cause them to decay. Insects above or below the surface may attack and destroy them. For these reasons, D. V. Burrell gives no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds he sends out, and will not in any way be responsible for the crop.

NO PREMIUMS

I do not believe my customers approve of the giving of premiums. Somebody has to pay for them. My idea is to sell to those who buy to plant, looking forward to the growing of a good garden for home use or a PROFITABLE MARKET GARDEN and to sell these seeds as low as I can afford, quality considered, but not to cut down the quality in order to meet prices made by others. In making up this catalog I have been guided entirely by the quality of the seeds I have to offer and the supply.

I trust you will favor me with your orders, which will be carefully filled.

Yours very truly,

D. V. BURRELL.

The Mountain States Largest Seed Gardens

D. V. Burrell's of Rocky Ford, Colorado

Under the summer evening shadow of Pike's Peak at an elevation of over 4,000 feet, where the days are warm and the nights are cool, the temperature often varying as much as 40 degrees, are located the extensive Seed Gardens of D. V. Burrell, nearly four thousand acres (4,000 acres).

Here under the most favorable conditions to the production of seeds of strong vitality are grown a great variety of Vegetable and Flower Seeds for which the demand is rapidly growing not only throughout the United States, but in many foreign lands.

This seed catalog comes to you dressed in working clothes direct from the fields, telling you as near as I can the description of the varieties and their qualities, quoting you as low prices as I can afford and give the growing and harvesting of the seeds the proper attention.

Beware of cheap seeds. Good seeds cannot be sold at less prices than the produce necessary to furnish these seeds can be sold for on the markets. You can't expect to buy good seed wheat at 50c per bushel when milling wheat is worth \$1.50 per bushel. You can't expect to buy good cantaloupe seed at 50c per pound when a crate of cantaloupes which is necessary to produce a pound of seed nets \$1.25 per crate on the market. The cost of good seed is very little compared with the crop results. Buy the best you can get.

My seed crops this year are sufficient to plant nearly one million acres, and whether you plant very extensively for market or only plant a small home Vegetable or Flower garden, I hope to receive your order. Many of the most extensive and most successful planters of the country plant these seeds each year. I will endeavor to send you so good seeds that you will order again.

Send the names of a number of your friends who grow gardens, when you order, and I will send you some special seeds for your trouble. More names, more seeds.

Assuring you my best attention, I am,

Yours truly,

D. V. BURRELL, Seed Grower,

Rocky Ford, Colorado.

ASPARAGUS

Culture.—Asparagus will produce well in practically all sections of the country, and it should be in every garden. Plant the seeds thinly (2 to 3 inches apart) in rows 16 to 20 inches apart. This will produce the plants far enough apart so they need not be thinned. Keep free from weeds and cultivate well to get the best possible growth of plants. Transplant to permanent bed when the plants are either one or two years old. The soil for the permanent bed should be well drained and made very rich by covering with a heavy coat of barnyard manure. Disc the manure in and plow deep. Harrow several times as soon as plowed. Plow furrows 6 to 8 inches deep, 4 feet apart and set the plants 2 feet apart in the furrows, spreading the roots out well. Cover with 2 to 3 inches of earth, and after the shoots begin to come up cover more, until the furrows are leveled.

Fertilize well each year with well-rotted manure. Do not cut any the first year and only a part of the crop the next year. You should not cut a full crop until 4 years old, and if well cared for, the bed will continue to produce from twelve to twenty years.

Very careful tests have proven the Washington superior to all others in yield and also best to withstand unfavorable weather, as this variety does not rust easily.

Nearly all markets now call for Green Asparagus. The stalks should be cut about $2\frac{1}{2}$ or 3 inches below the surface when 6 inches high. This gives a stalk showing $2\frac{1}{2}$ inches white and 6 inches of natural color. They should then be tied in bunches $2\frac{1}{2}$ inches in diameter, $8\frac{1}{2}$ inches long. Grade the asparagus, making up the bunches from stalks of uniform size.

Make your asparagus bed where there is good air drainage, as there will be less liability to rust than if protected from the wind. Keep the soil full of humus so it will not blow badly. Give the soil a light dressing of slaked lime every two or three years; this will sweeten it and help keep away injurious insects. When the tops are brown in the fall, mow and burn them.

An ounce of seed produces about 500 plants. To be safe allow $1\frac{1}{2}$ pounds of seed for each acre of permanent bed you wish to set; 5,500 plants set an acre; \$400 to \$600 per acre is a very common return from asparagus.

Washington Asparagus

A highly improved strain. This strain is the result of selection since 1910 under the direction of the Bureau of Plant Industry of the United States Department of Agriculture, from which date the product of a single plant has increased so the stock can now be offered as a commercial variety.

WASHINGTON ASPARAGUS is highly rust resistant and produces a heavy crop of large, tender stalks. This is pedigreed seed.

As an asparagus bed is so long lived and the results from the best type so much better than from inferior stock the price of seed is so small an item you cannot afford to consider it.

I offer **Martha Washington Asparagus** seed per pkt., 25c; per oz., 50c; per $\frac{1}{4}$ lb., \$1.75; lb., \$6.00; per lb. in lots of 10 lbs. and up, \$5.50 per lb.

PALMETTO ASPARAGUS.—This has been the favorite variety for a number of years and has been the source of large profit to the leading asparagus growers. My seed was saved from a special field grown by one of the most successful growers of the country. It is large, very early and an abundant yielder.

The plants are able to resist diseases to a remarkable degree.

Price—Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 30c; lb., 85c; 10 lbs. and up, 75c per lb., prepaid.

GARDEN BEANS

Beans like a dry and rather light soil, though they will do well in any garden soil, if not planted too early in the spring. Planting should be delayed until all danger of frost is over. Dwarfs are earliest and most hardy, as a general rule. In garden culture beans are usually planted about 2 inches deep, in rows 18 inches apart, and 3 inches apart in the row; in field culture, in drills 2 to 3 feet apart, so as to cultivate with horse one way. Until blossoming season, frequent but shallow cultivation should be given. It is useless to expect a crop from a poorly-prepared field, or from one that needs deep stirring after planting, as cutting of the roots after the plants show bloom is very apt to kill the vines and ruin the crop. Two pounds will plant 100 feet of drill, and sixty pounds is sufficient for an acre.

Running beans, especially the Limas, are even more tender than the Dwarfs; therefore, planting must be delayed still later, or until liability to rot in consequence of cold, damp weather has passed. Plant five or six beans in each hill, about 2 inches deep, hills 3 feet apart each way. Two pounds of seed will be sufficient for 100 hills of Limas, and 250 to 300 hills of the other varieties.

Some market gardeners risk planting part of their crop five or six days before the average time of the last frost in the spring so that if they are fortunate and miss the frost they will be early on the market. To afford a regular succession of crops throughout the season, plant every two weeks after the first planting until mid-summer.

THE BEST TWO ROUND-POD SORTS FOR SNAP BEANS. One green pod, the other wax pod, are listed below:

Burpee's Stringless Green Pod

If I were to grow but one Green Pod Snap Bean it would be this variety.

The pods are fleshy, being full and round before the beans begin to attain any size. They continue to bear a long time when kept picked off, and by planting two or three times during the season, the first planting as soon as danger from frost is past, and then later, about four weeks apart, you have snap beans covering a period of three or four months. Price—Pkt. 10c; ½ lb. 20c; lb. 35c; 5 lbs. \$1.50, postpaid. By express or freight, 10 lbs. or more 20c per lb.

Pencil Pod Black Wax

Again, if I were to grow but one wax pod snap bean, it would be this variety.

The plants are of bush growth, a very vigorous grower, producing abundant yields under unfavorable conditions when most other wax sorts fail. The thick, meaty pods are entirely stringless and of excellent flavor. Price—Pkt. 10c; ½ lb. 20c; lb. 35c; 5 lbs. \$1.65, postpaid. By express or freight, 10 lbs. or more 22c per lb.

I do not spend large sums advertising. I put the money into the quality of the seeds I send to you. A pleased customer is the best advertiser.

Burrell's Spot Free Davis White Wax Beans

These beans have won a great reputation in the South because of their resistance to pod-spot. I have some very fine stock of this variety, crop good, but demand has already taken most of them.

The pods are long, straight, and stringless while young. Color, a waxy yellow, and an excellent shipper. Price—Pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid. By express or freight, 10 lbs. or more 22c per lb.

WARDWELL'S KIDNEY WAX. Long, waxy yellow pods. A well-known sort. Price—Pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. or more 22c per lb.

IMPROVED RED VALENTINE. Green pod. Well known, a heavy yielder. Price—Pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. or more 20c per lb.

REFUGEE—1,000 TO 1. A popular late green-podded sort, very productive. Price—Pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. or more 20c per lb.

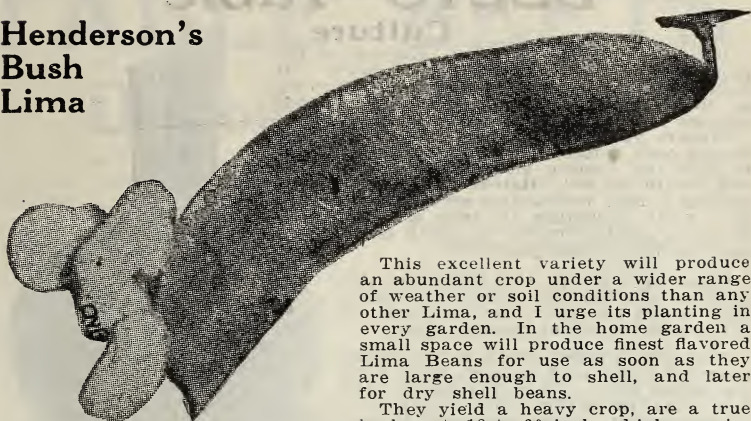

BLACK VALENTINE. Pods green. Well liked by Southern growers. Can be planted earlier than most sorts. Price—Pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. or more 20c per lb.

NAVY BEANS, \$12.00 per 100 lbs. Hand-picked stock. This price by freight or express. Prepaid price—Pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 28c.

PREPARE A GOOD SEED BED. Work the ground several times before planting. Fertilize well. The best crops are grown where the crops get the best care. It is not hard to double the value of the crop by proper cultivation and fertilization.

LIMA BEANS

Henderson's Bush Lima

This excellent variety will produce an abundant crop under a wider range of weather or soil conditions than any other Lima, and I urge its planting in every garden. In the home garden a small space will produce finest flavored Lima Beans for use as soon as they are large enough to shell, and later for dry shell beans.

They yield a heavy crop, are a true bush sort, 18 to 20 inches high, require no support and are early, coming in weeks ahead of other limas, and bearing continually until frost. The beans have the true Lima flavor, buttery, rich and tender. Price—Pkt. 10c; ½ lb. 20c; lb. 35c, postpaid.

By freight or express, 10 lbs. and up 22c per lb.

BURPEE'S BUSH LIMA. A bush form of the large white Lima, which grows about 20 inches high. The beans are very large and of excellent quality, fully equal to the pole Lima, both in quality and size. Price—Pkt. 10c; ½ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. and up 22c per lb.

BEANS—POLE

KING OF THE GARDEN LIMA. This standard market sort is one of the best for main crop. The growth is strong and the yield abundant. The bearing season continues until frost. The pods are large, containing five or six large, white beans. This variety is especially valuable where the garden space is limited, as a few hills will supply a good-sized family. Price—Pkt. 10c; ½ lb. 20c; lb. 35c, postpaid.

By freight or express, 10 lbs. and up 22c per lb.

THE LAZY WIFE'S POLE BEAN is entirely stringless, of fine flavor and bears an abundance of large pods, which are fit for use until nearly ripe. A good white shell bean for winter use. Price—Pkt. 10c; ½ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. and up 22c per lb.

OLD HOMESTEAD OR KENTUCKY WONDER. Very prolific; bears its pods in large clusters; pods green and often 8 to 10 inches long; nearly round when young, and very crisp. Price—Pkt. 10c; ½ lb. 20c; lb. 35c, postpaid. By freight or express, 10 lbs. and up 22c lb.

Dry or Shell Beans

TEPARY. This small white bean is about the size of Dwarf Navy Beans, but will grow where the amount of rainfall is less than necessary to produce a crop of other beans. It is a heavy yielder and will prove a very valuable crop on semi-arid land. The quality is equal to the Navy and it is preferred by some. Price—Pkt. 10c; ½ lb. 15c; lb. 30c, postpaid. By freight or express, 10 lbs. \$1.50; 100 lbs. and up \$12.00 per 100 lbs.

PINTO OR MEXICAN BEAN. The Colorado Pinto Bean has taken a prominent place in the shell bean market, and the sales now amount to several million dollars a year. The stock I offer is hand-picked quality for seed and much better than the ordinary stock on the market. Price—Pkt. 10c; ½ lb. 15c; lb. 25c, postpaid. By freight or express,

10 lbs. \$1.50; 100 lbs. and up \$12.00 per 100 lbs.

NAVY BEANS. These well-known white shell beans are the standard dry or shell bean for baked beans or bean soup. So well known that they need not be described. Price—Pkt. 10c; ½ lb. 15c; lb. 28c, postpaid. By freight or express, 10 lbs. \$1.50; 100 lbs. and up \$12.00 per 100 lbs.

BEETS—Table Culture

Beets are very easily grown and one of the profitable crops for the market grower. If desirable to be very early, they may be grown in the hotbed and transplanted, for which purpose I recommend Crosby's Egyptian.

Prepare your soil by manuring heavily and disking well before plowing, to make it easier to turn the manure under and to thoroughly mix it with the soil. Harrow as soon as plowed, making a fine, well-settled seed bed. It is a great advantage to drag or float the land, as this crushes all small clods and settles the surface well.

Plant as early in the spring as the weather will permit. Beets will stand light frosts, but care must be taken, as a heavy frost would destroy them.

The rows should be 16 to 20 inches apart and the seed planted from 1 to 1½ inches deep. When the plants have five or six leaves thin table beets to 4 to 6 inches apart. Sugar beets and Mangel Wurzel 10 to 12 inches apart. Plant 6 to 8 pounds of table beets or stock beets per acre and 20 pounds of sugar beets per acre.

Table beets may be sown at intervals of four weeks until the latter part of June to have tender, even sized beets throughout the season from late summer until winter, the later planting being for siloing to use or sell during the winter.

I make a specialty of beet seed and sell thousands of pounds each year.

Crosby's
Egyptian

CROSBY'S EGYPTIAN Burrell's Special Stock (See Cut)

This is extremely early, being one of the first early beets. The shape is nearly round, very smooth, a rich red, fine-grained and of extra quality. The tops are small, making fine bunches. They have a very distinctive bright red color and are uniform in shape and appearance.

The tap root is small. The type is well illustrated in the cut herewith.

10c per oz.; 30c per ¼ lb.; 90c per lb.; 10 lbs. and up, 80c per lb., prepaid.

BURRELL'S CRIMSON GLOBE

This very valuable second early sort is a fit companion to my strain of Crosby's Egyptian. The color is darker red, shape just a little more square shouldered and a little deeper from base of top to tap root. The leaves are very dark red and tops small. It is a good beet to grow for late crop and keeps well when pitted, until late in the spring. It is beautifully zoned. Will please you.

10c per oz.; 30c per ¼ lb.; 90c per lb.; 10 lbs. and up, 80c per lb., prepaid.

Edmand's Early Flood Turnip

The roots of good form; round; one small tap root; the flesh deep blood-red; very sweet and tender; a well-known and excellent sort.

10c per oz.; 30c per ¼ lb.; 90c per lb.; 10 lbs. and up, 80c per lb., prepaid.

Prices represent only a very reasonable profit above actual growing cost.

Burrell's
Crimson
Globe

You will not worry as much as others about how times will be if you grow a good garden, plenty of chickens, some hogs. Keep a few A 1 milch cows and keep busy. Everybody will keep on eating and you have first choice. **GROW A GOOD GARDEN.**

TABLE BEETS

Detroit Dark Red

This fine, dark red beet is a leader with me. I recommend it for either the home or market garden. I also sell large quantities of it to canning factories, as its uniform shape and dark red color make it very well liked for canning.

Detroit Dark Red

The tops are small, dark green and red, the roots globular, very smooth; the flesh a deep red, shaded with black red zones. This beet is acknowledged by the beet seed specialists throughout the world as the most uniform in size, shape and color, and of the highest quality. 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lbs. and up, 90c per lb., prepaid.

Long Blood Red

A standard late variety of good quality; keeps well through the winter; roots smooth, with few side roots. Color very dark purple; flesh dark red, of excellent quality; very good for pickles. 10c per oz.; 30c per $\frac{1}{4}$ lb.; 90c per lb.; 10 lbs. and up, 80c per lb., prepaid.

Sutton's Globe

This valuable sort was developed by Sutton & Sons, whose seed-growing establishment is one of the leading in Europe. This beet will rank with the first in quality and appearance. It is nearly round; has the good points of Crosby's Egyptian and is a thoroughbred as to type. Plant it either for home or market garden. 10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; 10 lbs. and up, \$1.60 per lb.

Johnson's Defiance

This is a square-shouldered, globe-shaped, dark red, main-crop sort, which will be found a good variety for market or home garden. The tops are very dark red. This was developed by Johnson & Sons, another of Europe's leading growers, and that they gave it their name shows they consider it one of the best—one that defies all others. 10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; 10 lbs. and up, \$1.60 per lb.

Burrell's Seeds Market Gardener's Quality and Prices

COST OF SEED. Much of the cost this year is in cost of labor, packets, freight and items separate from the seeds alone. I am keeping other costs as low as possible. I believe you would rather have good seeds for less than that I should add to the cost on account of an expensive catalog or highly colored packets. Yours for GOOD SEEDS.

MANGEL WURZEL

Giant Long Red

**Often Yields 40 to 60 Tons
Per Acre**

Giant Long Red

This is the largest, heaviest yielder of the Mangel-Wurzels. A yield of fifty tons per acre is very commonly harvested, and with ordinary care on well-fertilized soil they should produce twenty-five to thirty tons per acre.

They contain 5 to 7 per cent sugar and have high feeding value.

Every farmer should grow Mangel-Wurzels, and a part of the crop may well be this variety. The roots are shaped as shown in cut made from a photograph. Color red, flesh white tinged with rose; grows about one-half out of the ground; easily harvested. Price—10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb., prepaid. By freight or express, 10 to 30 lbs., 50c per lb. Special prices on 100 lb. lots.

Golden Tankard

Yellowish orange color. Not so long but thicker than Giant Long Red. Flesh yellow zoned with white; grows partly out of the ground; an immense yielder and preferred by many. Can easily be pulled from ground without plowing loose. Price—10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb., prepaid. By freight or express, 10 to 50 lbs., 50c per lb. Special prices on 100 lb. lots.

Farmers and Stockmen: I can do you no greater favor than to induce you to plant these Stock Beets for your hogs and cattle. They are easily grown and an acre will feed 100 hogs from 30 to 40 days under favorable conditions. Plant a few acres this year and you will continue to do so each year.

Giant Half Sugar Rose

This is by many considered the greatest beet for feeding stock. It is richer in sugar than the Mangel-Wurzels and not so rich as sugar beets. What it lacks in sugar it makes up in tonnage yield per acre, and not being so sweet is less liable to injure the kidneys when fed in very large quantities, compared with sugar beets. It grows about one-half out of the ground and is excellent for all kinds of stock.

One acre of this will produce as much food value as eight to ten acres of corn.

The shape is as shown in cut above. Color, rose above the ground, white below; flesh white, sometimes slightly tinged with rose. Price—10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb., prepaid. By freight or express, 10 to 50 lbs., 50c per lb. Special prices on 100 lb. lots.

When hogs sell for less produce the meat for less by feeding them Mangel-Wurzel Beets along with corn.

CARROTS

Culture.—Any good soil is suitable, manure it well, plow deep and prepare the seed bed as for beets. It is a good plan to plant a few radish seed with the carrot, as carrot starts slowly and the radish mark the rows so they can be cultivated before the carrots come up. Plant rows same distance apart as beets and thin to about 4 inches apart in the row, or if from 2 to 4 inches apart, they need not be thinned. Cover about 1 inch deep. Cultivate often and thoroughly. Sowing may be made as early in the spring as the soil can be put in good condition, or up to June 15 to 20. Two and one-half to three pounds of seed per acre.

Chantenay Half Long

This excellent sort is well illustrated in above cut made from a photograph of a sample produced from my seed. The roots average about 6 inches in length, shaped as shown in cut, deep orange color, smooth, flesh very tender and first-class in every way; medium early; one of the best for market or home garden. It is very productive and easily harvested. Price—10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lb. lots and up, 90c per lb., prepaid.

OXHEART OR GUERANDI. This is a very desirable sort. The roots are thick and $4\frac{1}{2}$ to 5 inches long, shape slightly resembling an ox's heart, hence the name. This variety grows better than any other in heavy soil, owing to the short root. The flesh is a bright orange, crisp, tender, fine-grained and sweet. An excellent sort for table, and when full grown produces a profitable crop for stock feeding. Price—10c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lb. lots and up, 90c lb., prepaid.

DANVER'S HALF-LONG. A half-long orange carrot; very productive and suitable to almost any soil. Flesh a deep orange; fine-grained, crisp and tender. Being such an abundant bearer and of so good quality, it is considered one of the best and the demand for it for both market and home garden is heavy. Price—10c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lb. lots and up, 90c per lb., prepaid.

LONG ORANGE. This valuable sort produces roots often 12 inches in length and 3 to $3\frac{1}{2}$ inches in diameter at the crown, tapering regularly to the small tap root. Color a very deep orange, suitable for table use or stock feeding. Succeeds best in a deep, loamy soil; fine-grained, crisp, tender and of excellent quality. Price—10c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lb. lots and up, 90c per lb., prepaid.

IMPROVED SHORT WHITE. One of the most productive. The roots run as much as 4 inches in diameter at the top and taper to a point at the small tap root; length 8 to 10 inches. They will grow to this size on good, rich soil, where nearly all touch each other in the rows. Thin to 4 inches apart. Color creamy white with light green crown. Flesh white, solid and of excellent quality for stock feeding. Price—10c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; 90c per lb.; 10 lb. lots and up, 75c per lb., prepaid.

The Cucumber Seed crop grown here at Rocky Ford, Colorado, this year, 1920, is about 95 per cent of all grown in the U. S. Quality built up the business. Quality continued will keep it. I am for keeping it. I want your seed order.

CABBAGE

I Sell Thousands of Pounds

Since starting in the seed business I have sold only the finest grade of cabbage seed obtainable. This seed is produced for me by the leading specialists of the world. Certain sorts which reach the highest development and produce the highest grade of seed in Denmark I have grown there; others in Holland, Long Island and Puget Sound.

With cabbage, the first point is good seed. No matter how well you care for the crop you will fail if you have not reliable seed.

Culture

The soil should be rich and the preparation thorough. Cultivate, cultivate, and keep it up. If under irrigation, frequent irrigations are an advantage, but do not water to take the place of cultivating.

For early cabbage, except in the extreme South, sow the seed in hot beds and transplant to cold frames, setting out in open ground as early as possible in the spring. For late cabbage start the plants in the open the 1st of May in most sections and set out in the permanent row when the plants are 4 to 6 inches high. Many plant the seed in hills, 10 to 12 seeds to the hill where the crop is to grow and thin to one when 3 or 4 inches high. This avoids transplanting. Continue hoeing and cultivating until the heads begin to form.

To destroy the worms, road dust or any fine dust sprinkled over the plant is effective, or spray with soap emulsion or kerosene emulsions. To store for winter use pull the cabbage and set in trenches with the heads down, covering with earth and protecting from rain. The roots should not be entirely covered until cool weather, to prevent heating. Do not trench the cabbage until just before cold weather.

I tested eighty-five varieties of cabbage and among others several new strains of which I purchased all the available seed of two sorts, which I list as the "D. V. B." Cabbage and Burrell's Kraut King. These two are great additions to the list, and every grower should plant them.

If you use 100 to 1,000 pounds or more seed per year, write for my special offer on growing contracts. I produce thousands of pounds of various kinds of seeds under contract for large planters at as low prices as good seeds can be grown.

The sorts which I list I know to be of the best.

One oz. of seed for 3,000 plants; $\frac{1}{4}$ lb. of seed per acre.

Burrell's Large Charleston Wakefield Cabbage

This fine, large early cabbage is but a few days later than the very earliest small sorts, is a very strong, thrifty grower, but little bothered by insects. The heads weigh from 6 to 10 pounds, sometimes more; are very solid and profitable for the early market. My seed is grown in a section where there is nothing to be desired to permit the growing of the finest cabbage seed. You cannot buy better seed at any price. Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 35c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.00 per lb.; \$2.75 per lb. in 5-lb. lots and up.

I have enough cabbage seed this year to grow a few heads for every person in the U. S. If you buy large lots let me quote special prices.

Early Jersey Wakefield Cabbage

Earlier than Charleston and smaller heads, more pointed. Extensively grown in the South. I supply large quantities of this to Southern growers, but not so much as of Charleston Wakefield. Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 35c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.00 per lb.; \$2.75 per lb. in 5-lb. lots.

An ounce of cabbage seed is about 6,500 seeds and allowing part for loss will make say 3,000 plants and this means the best seed only costs this year from 10c to 20c per 1,000 plants.

The D. V. B. Cabbage

Another year has proven the great value of this extra Early, Round, Solid-headed Cabbage:

It is reported by large numbers of my customers to be the finest Extra Early Cabbage they ever saw.

The demand has grown very large for this seed and this year I have produced several hundred pounds of seed. Market Gardeners will find this a big money-maker and it should be in every home garden.

You know an ounce of cabbage seed will make about 3,000 plants, and as 4 ounces will, if carefully grown, produce plants for 1 acre—\$4 worth of this seed may bring you several hundred dollars from your crop before your competitor gets on the market.

It is earlier than Jersey Wakefield; produces 4 to 6-pound round solid heads, which are just the right size to sell well. Be sure to order some of this. Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; 55c per $\frac{1}{2}$ oz.; \$1 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$13 per lb.; 10-lb. lots, \$12.50 per pound, postpaid.

Cost of seed practically nothing compared with a good crop.

Burrell's Kraut King Cabbage

First introduced as Burrell's Victor.

I supplied this seed to a number of the leading Kraut Manufacturers and they report better results for kraut than they have gotten from any other sort. The demand for this purpose has grown so large that I have renamed it Burrell's Kraut King.

When you consider the value of the crop the cost of the seed is practically nothing. I recommend it alike to Market Gardeners and to Kraut Manufacturers.

This second early cabbage is as early as early spring and produces large, round, solid heads, often weighing 15 to 20 pounds, and suitable to use when weighing 5 to 6 pounds, has no superior for quality or tonnage of yield per acre.

Here are some extracts from a few letters:

Mr. Snalls Tibbs, Lancaster, Ohio, says: "Your cabbage is all right; it can't be beat for solid heads."

Mr. F. E. Daggett, Topsham, Maine, says: "I must say it was well worth the price compared with other varieties planted alongside and this I assure you was a pleasant surprise to me, for I thought I was growing some of the most profitable early and second early varieties to be had."

Mr. Roland C. Dennis, Martin's Ferry, Ohio, says: "I want to say that I believe it is the best cabbage ever introduced into the neighborhood, both in flavor, especially in sweetness, and solidity. I set it with four other so-called good cabbages and it was far ahead of them; also I believe it is a good resister of drouth, as the season was very dry in this section."

Mr. L. R. Waggoner, Marion, Indiana, says: "Cabbage were extra fine. Please book me one-half pound of seed for next season."

I want all of my customers to plant some of this seed.

Price—10c per pkt.; 30c per $\frac{1}{2}$ oz.; 50c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.50 per lb.; 10-lb. lots, \$4.25 per lb., postpaid.

CABBAGE

Two very
Valuable
Sorts

Early New Cabbage, Copenhagen Market

This new cabbage is of very great merit, being as early as Charleston Wakefield and having the round, solid head of the Danish Ballhead. Every cabbage grower should plant some of it. This may prove to be the variety that will be a big money maker for you. The introducer says: "It is undoubtedly without a rival as the finest large round-headed early cabbage in cultivation."

The heads average 8 to 10 pounds each, very solid, with small core and very fine quality. The plant is short-stemmed, the heads being produced very near the ground level. The leaves are closely folded and few outer leaves. The plants may be set closer than ordinary cabbage will permit.

This sort is well known and market gardeners plant it very extensively.

Price—10c per pkt.; 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$2.25 per $\frac{1}{2}$ lb.; \$4.00 per lb.; 10-lb. lots, \$3.75 per lb., postpaid.

Enkhuizen Glory Cabbage

This new sort originated near the shores of Zuyder Zee in Holland.

It is large, early, white, solid, new. The originators have this to say:

"Amongst many sorts of white cabbage, none of them combines these two desirable qualities of being early and large so well as the aforesaid sort. We can recommend this as a really early one (coming as early as the Early Dutch Flat), but at the same time making fine, large, ball-shaped heads, particularly attractive for market purposes.

"The plants are somewhat pale green, and in proportion to the whole making very little outside leaves and fine large form, thin ribbed, hard heads.

"For the market one of the very best sorts."

This leaves little to be added except that I have thoroughly tested the variety and can recommend it as being a very fine sort, worthy your confidence. Do not hesitate to plant it extensively if you desire such a cabbage as is described above.

Price—10c per pkt.; 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$2.25 per $\frac{1}{2}$ lb.; \$4.00 per lb.; 10-lb. lots, \$3.75 per lb., prepaid.

CABBAGE

Extra Fine All-Seasons Cabbage

Plant it early for a second early and late for a late sort, or your early planting will be suitable to use when the heads weigh 6 or 8 pounds and continue first-class until they weigh 12 to 15 pounds. Then they stand a long time without bursting when many other sorts would burst open and spoil. It may well be called All-Seasons. The heads are large and solid, round and flattened on top. Are ready to market as soon as the early flat sorts.

My experience with this sort is so favorable that I cannot fail to list it among the sorts I wish most to recommend. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.25 per lb., prepaid.

Improved Succession

A sure heading, long-keeping variety about 10 days later than the well-known Early Summer, with larger and heavier heads. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.25 per lb., postpaid.

Burrell's Selected Surehead Cabbage

This excellent cabbage has been grown many years by thousands of successful gardeners with uniformly good results. Close, careful selection has kept it one of the best. The heads weigh about 12 pounds, are quite uniform in size, hard and of excellent quality, a good shipper. I recommend it either for your home garden or if you plant extensively for market. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.25 per lb.

Burrell's Excelsior Flat Dutch

Large, late, sure header, short stem, extra good. Earlier than Premium Late Flat Dutch. Practically every plant produces a fine head. I get good reports on this from all parts of the country. You will find this an excellent late sort and a good keeper. Price—Pkt, 10c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.25.

FOTTLER'S BRUNSWICK—Large, midseason, solid heads, very heavy for size, good quality, heavy yielder. Price—Pkt., 10c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.25, postpaid.

PREMIUM LATE FLAT DUTCH CABBAGE—This standard sort is well known and our sales always run high. The heads are large, flat and of good quality. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.25 per lb., postpaid.

ST. LOUIS LATE MARKET—This is a favorite sort among market gardeners around St. Louis. It is very solid and produces heads weighing from 15 to 18 pounds; is a sure keeper and the quality extra. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.25 per lb., postpaid.

THE HARLEQUIN BEETLE. This beetle is spotted gray, red and black. During the past season it did great damage to growing crops, especially cabbage. One of the Rocky Ford gardeners took a blow torch and passed the flame quickly over the cabbage heads. This destroyed the beetles but did not injure the cabbage. He grew a good crop. Be careful not to allow the flame to remain in one place too long. Experiment on a few heads until you know just how to use it.

CABBAGE

Special Early Flat Dutch Cabbage

The results in the South from this seed have been so good my sales have been hundreds of pounds a year.

The heads weigh 8 to 10 pounds, are very even in size, solid and of good flavor.

This is one of the best second early and stands a long time without bursting.

The plant is short-stemmed, the heads are very solid and uniform in size and shape, slightly flattened; matures as a second early sort. This sort is planted very extensively in the South.

Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 35c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$3.50 per lb., prepaid.

Early All-Head or Faultless

This is an excellent sort, producing a good, solid head weighing 6 to 8 pounds from practically every plant, under fair conditions. It is among the earliest sorts and is a very profitable sort to grow. The outer leaves are few and close planting can be made, as close as 18 inches in the rows and rows 2 feet apart.

Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 35c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$3.50 per lb., prepaid.

EARLY SPRING. The earliest Flat Head variety. The heads have few outside leaves and these are small and grow so close to the head that they can be planted very close together. It is round in shape, slightly flattened and very solid, even before the cabbage attain their mature size.

Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 35c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$3.50 per lb., prepaid.

EARLY SUMMER. My seed of this variety was selected from large, solid, evenly-sized heads of excellent quality, and is of known value. This is a special market gardener's strain. It is not as well known for home gardens and not as much planted as it should be.

Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 35c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$3.50 per lb., prepaid.

CABBAGE

SHORT STEMMED DANISH ROUND HEAD

Very hardy, handsome, very solid, of fine quality and as one of the very best keepers it is particularly desirable for distant markets or for late spring use. The plant is vigorous, compact growing, with shorter stem than most American sorts and exceedingly hardy in resisting cold and dry weather. The leaves are few but rather large, thick, smooth, bluish-green covered with whitish bloom. The head is medium-sized, round, very solid and stands shipment better than any other late sort.

This is of the finest possible selection, grown especially for me. It is impossible to buy better seed of this strain; quality is always the first item to consider. This is an excellent market sort. I am not striving to be able to offer my customers low-priced seeds regardless of quality, but first to offer the best possible quality and then make the price as low as I can and have sufficient pay for the most critical care and selection. I want orders from those who want the best seed money will buy at a fair price.

Large planters will find this variety excellent for late planting and a money-maker. The weight of the heads of this sort trimmed is much more for the same size than the American sorts. (Flat Dutch, etc.) Price 10c per pkt.; 20c per $\frac{1}{2}$ oz.; 40c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$3.75 per lb.; \$3.50 per lb. in 10-lb. lots and up, postpaid.

These two varieties of cabbage sell on the winter markets at about $\frac{1}{4}$ more per ton than other sorts. When others sell for \$40.00 these sell for about \$50.00 per ton. On 15 tons per acre this gain is about \$150.00 per acre, which many times over covers the cost of the seed.

Middle Stem Danish Ballhead or Hollander

This variety is similar to above, except the stem is longer. (See cut.) It is one of the finest sorts for winter, either for the home garden or for the market. This also is grown from very carefully selected heads especially for me by one of the most critical growers. Price—10c per pkt.; 20c per $\frac{1}{2}$ oz.; 40c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$3.75 per lb.; \$3.50 per lb. in 10-lb. lots and up, pre-paid.

Burrell's Kraut King

(See page 11.) This is the finest kraut cabbage grown, also the fine second early sort for market gardeners. If you think you have been planting the best, plant some of this beside it and compare results. For prices, see page 11.

CAULIFLOWER

Cauliflower, although one of the most delicate vegetables, is but little grown except by professional gardeners because of the erroneous notion that it is so difficult to grow that only skilled gardeners can produce it. Anyone will be reasonably sure of success with this most desirable vegetable if the cultural directions given below are carefully observed.

For spring and early summer crop, sow in March or early in April in hot bed and transplant to cold frame when sufficiently large to handle. As soon as danger of hard freezing is over set in the open ground in rows 2½ feet apart and 18 inches apart in the row. The plants will endure a light frost. The soil for cauliflower should be like that for cabbage, but it is better if made richer than is ordinarily used for that crop. Plenty of good manure must be well incorporated with the soil and the latter be brought into the highest state of tilth. No application, however, can be more necessary or more useful than that of cultivator and hoe. For late crop, sow at same time as for late cabbage and treat in the same manner. It should be borne in mind that cauliflower will not head up well in hot, dry weather and hence the sowings need to be so timed as to bring the heads to maturity either before the hot summer weather sets in or not until the cooler weather of the fall. If it receive at this time a liberal supply of water, the size and quality of the heads will be greatly improved. After the head begins to form, draw the leaves over and tie them together to protect it from the sun and keep it white.

Each time you go over and tie the heads as above it is a good plan to use a different colored string. Calico strips are usually used. This will help you when cutting the heads to know which are ready.

The heads should be cut for use while the "curd" is compact and hard, as they soon become much impaired in quality and appearance after they open and separate into branches. Of the enemies of the crop, none is more formidable than the cabbage root maggot. This seems to have a special liking for the cauliflower. Probably the best and most surely effective protective measure is enveloping each plant with a tight-fitting collar of tarred felt. Plant lice are also serious pests of this crop. Effective remedies are dusting with fine tobacco dust, or spraying with strong tobacco tea or kerosene emulsion.

All the cauliflower seed we offer is produced by the most experienced growers in Europe, in such localities as are best suited to its proper development, and the greatest care is taken to save seed from perfectly developed plants only.

Burrell's Extra Select Early Snowball Cauliflower

This variety is the highest attainment in the development of the cauliflower. This seed is grown for me by an expert specialist in Denmark. Every care is taken to have the seed right. The heads are selected for a close, white curd, solid and uniform.

The cultivation is done in the most thorough manner and the seed is then selected from the single plants which continue to show the highest development. The seed is then graded and I receive only the largest, best developed seeds. This special pains is of great value to my customers, as in this crop so much depends upon the quality of the seed. This sort is remarkable for its extreme earliness, sureness to produce fine, solid heads with a close, white curd. The leaves are produced in sufficient quantity to tie nicely over the head, while the curd is small and permit them to blanch very white. The heads are round and thick, often weighing 6 to 10 pounds before the curd begins to separate. No better strain can be produced. Market growers especially can plant this seed and be assured that it is the seed which will give them the best possible results.

Considering the extreme care taken and the crop results, the price is right. Price—10c per pkt.; 45c per ¼ oz.; 80c per ¼ oz.; \$1.55 per ½ oz.; \$3.00 per oz.; \$9.00 per ¼ lb.; \$32.00 per lb., postpaid.

Cauliflower

Henderson's Early Snowball Cauliflower

Its dwarf habit and short outer leaves allow it to be planted as close as 18 to 20 inches apart each way. Very valuable for market gardeners. My stock is as fine as possible to secure. Price—10c per pkt.; 45c per $\frac{1}{8}$ oz.; 80c per $\frac{1}{4}$ oz.; \$1.55 per $\frac{1}{2}$ oz.; \$3.00 per oz.; \$9.00 per $\frac{1}{4}$ lb.; \$32.00 per lb., postpaid.

Select Early Dwarf Erfurt Cauliflower

Of dwarf habit, close, compact growth, a sure header, curd close and white; very reliable. Price—10c per pkt.; 75c per $\frac{1}{4}$ oz.; \$2.50 per oz.; \$8.00 per $\frac{1}{4}$ lb.; \$30.00 per lb., postpaid.

Early Short Stemmed Danish Giant Cauliflower

This is an early sort, a sure header and one of the best produced. While not quite so early as Burrell's Extra Select Early Snowball, it is equal in quality, and no matter how critical your trade or how much you have been able to do in producing cauliflower, you can expect to equal your best record with this seed, except as stated as to earliness. Price—10c per pkt.; 40c per $\frac{1}{8}$ oz.; 80c per $\frac{1}{4}$ oz.; \$1.55 per $\frac{1}{2}$ oz.; \$3.00 per oz.; \$9.00 per $\frac{1}{4}$ lb.; \$32.00 per lb., postpaid.

As to Prices: I handle only the finest Danish-grown cauliflower seed obtainable. I have a fair supply on hand of good germination and variety. You will be well pleased with this seed.

CELERY

Golden Self Blanching Paris Golden

For several years the French crops of this seed have been very short and it has been almost impossible to get dependable seed.

I have had this grown in the most favorable part of the United States after the most approved methods; all green or hollow stalks being carefully culled out and have to recommend what I believe to be of the best possible American production of this seed. The stalks are a beautiful creamy yellow. The heart is large, solid, crisp and brittle. Price—10c per pkt.; 40c per ½ oz.; 75c per oz.; \$2.00 per ¼ lb.; \$7.50 per lb., postpaid.

FRENCH GROWN GOLDEN SELF-BLANCHING

The best I can secure from the leading French growers. Price—10c per pkt.; 75c per ½ oz.; \$1.35 per oz.; \$4.25 per ¼ lb.; \$7.50 per ½ lb.; \$15.00 per lb., postpaid.

Selected White Plume Celery

This is the earliest sort, and most easily blanched. The plant is a rapid grower and should be tied loosely together as soon as 5 or 6 inches high and earthed up to push the growth and blanching, also to insure close, attractively shaped branches.

My seed is of extra quality and always gives good results.

Price—10c per pkt.; 25c per oz.; 80c per ¼ lb.; \$3.00 per lb., postpaid.

Snowwhite Celery

VERY POPULAR EXTRA EARLY

I have already received a large number of orders for this seed, stating they wanted the same class of seed as gotten last year.

The Snowwhite Celery was introduced eight years ago and has won a favorable place as one of the finest sorts. The stalks are perfectly white, of good size and very attractive in appearance. The plants grow vigorously, are easily blanched, and the rich, nutty flavor, crispness and general high quality are to be prized. The stalks often weigh, when trimmed, from 1½ to 2 pounds. It keeps well and grows on any soil that will produce any other variety of celery. Price—10c per pkt.; 40c per oz.; \$1.40 per ¼ lb.; \$5.00 per lb.; \$4.75 per lb. in 5-lb. lots and up, postpaid.

Giant Pascal Celery

This is one of the most popular varieties for winter use. It is a very good keeper and properly stored can be kept until late in the winter or even until spring.

Giant Pascal is of vigorous growth, making large, heavy, thick stalks which remain green until blanched by some artificial means, either by earthing or storing for the winter.

It blanches to a creamy yellow when the stalks are quite brittle, entirely stringless and very crisp.

I have sold large lots of this seed to market growers, who report excellent results.

Price—10c per pkt.; 30c per oz.; 75c per ¼ lb.; \$2.50 per lb.; \$2.25 per lb. in 5-lb. lots and up, postpaid.

GOLDEN HEART OR GOLDEN DWARF

An excellent standard sort, solid, a good keeper and of a fine nutty flavor. A late variety; one of the best for market gardeners.

Price—5c per pkt.; 15c per oz.; 50c per ¼ lb.; \$1.75 per lb.; \$1.60 per lb. in 5-lb. lots and up, postpaid.

This special item has had my careful study covering the past twenty-two years, during which time I have grown many thousand acres of cucumbers for seed, producing many hundred thousand pounds of seed.

I come to you for your orders for this seed, knowing what I have to offer is of the best produced. This year my crop amounted to near two hundred fifty thousand pounds.

I started the growing of cucumber seed here, and the results from my seed have been such that a very large portion of the cucumber seed of the United States is now grown here (over ninety per cent).

Each year I exercise great care to produce such seeds as will keep up this reputation. This requires carefully selected stock seeds. Soil which has not the year previous produced cucumbers, so that volunteers may be avoided; isolation from fields of other varieties; careful attention during the growing season that all off plants be destroyed; skill in harvesting, threshing, washing, curing, cleaning and testing the seed, that the best possible vitality and germination may be procured.

My constant attention to these points is your assurance that the seed which I offer is worthy your confidence. No order too small and large orders of from 1,000 to 10,000 pounds very frequently received. All orders given my very best attention.

Culture.—Cucumbers thrive best in a very rich, loamy soil, not containing too much sand. A rather heavy soil is preferable to sandy soil. The most successful growers fertilize heavily with barnyard manure, scattered evenly over the surface 2 to 3 inches deep, disced thoroughly, then plowed under to a depth of 6 to 8 inches, then thoroughly harrowed and floated. This gives an excellent seed bed.

You can now plant with your garden drill rows 4 feet apart, drilling in about 3 pounds of seed per acre, covering the seed about 1 inch in depth. You can follow the drill mark and cultivate before the plants come up. Cultivate often. When the plants have four to six leaves thin to one plant every 18 inches. Keep the cultivator going as long as you can get through the rows. If under irrigation, water once a week lightly and always cultivate between irrigations until the crop is laid by. Keep the cucumbers picked off as fast as they reach the size desired, as if any are allowed to ripen the plants cease to set on more fruit.

If bothered by the striped cucumber beetle, dust lightly with wood ashes into which a small amount of turpentine has been added, or well-slaked lime mixed with fine dust and a small amount of turpentine.

Be careful not to put too much lime or ashes on the plants, as this will injure them. Keep them growing rapidly and insects have less chance to damage them.

In picking to ship for slicing it is a good plan to divide the field into thirds and pick one-third each day. If under irrigation, lay off the lands in short rows and run the water along the rows very lightly after each picking.

Always cut off the cucumbers and handle very carefully. Do not ship any culls. Throw them away and ship only the first-class specimens. They look so much better the demand is kept up—the consumer is willing to pay a better price. There is less express and package expense and your reputation for a first-class pack is kept up to the advantage of your bank account.

When the market is high many are tempted to ship seconds. Don't do it; keep the market up with quality.

I want to call your especial attention to Burrell's Earliest of All Cucumber and Burrell's Klondike Cucumber. These two sorts are now more extensively planted by critical market growers than any other. They have been the means of a profitable business for thousands of growers. Some report from \$300 to \$1,200 per acre.

Burrell's Earliest of All Cucumber

This cucumber has proven the biggest money-maker ever planted by Florida growers, and the demand for the seed is growing very rapidly. This is a perfected type of White Spine. Earlier than any other strain of White Spine and as well colored as any cucumber grown.

The fruits when suitable to slice are 6 to 7 inches long, very dark green with pale green stripes about one-third the length from the blossom end; straight, square-ended and of the very finest quality.

It is a strong grower. The new blood gives it much more vigor than most old varieties have and it sets fruits in great abundance.

For pickling it produces fruits which when suitable for bottle goods are straight, square-ended and very firm. One of the large pickling companies writes me that they find it the best sort they have ever grown for this purpose and back it up with a large order for seed. The specimens shown above give you the type.

CAREFUL PLANTERS have tested this sort thoroughly in check plantings with the best of other varieties, and the results have proven this sort the most profitable to grow.

Burrell's Earliest of All Cucumber

Best for Florida Market Growers

At Williston, Florida, this sort is reported to be the most profitable the growers have planted. Planted in check test with four other leading sorts, it far outclassed them all, being earlier, darker green, and bringing more money.

My sales amount to more than twenty thousand pounds a year. I have bred this up by eighteen years of careful selection to an ideal type. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots; 75c per lb. in 100-lb. lots. Post or express paid.

Early Fortune Cucumber

This variety was developed from a special selection from Davis Perfect—the fruits are early—very dark green, 7 to 8 inches long when suitable for slicing. Southern planters have found this a profitable sort to grow. My crops this year amounted to several thousand pounds. I can take care of very large orders. Price—Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00; 10 lbs., 85c per lb.; 75c per lb. in 100-lb. lots.

CUCUMBERS

Burrell's Klondike Cucumber

This is one of my special items of my own introduction. It is a pleasure to be able to state that it has through merit and without extensive advertising worked into the favor of market growers until it is now one of the leaders. It is without an equal for outdoor growing for slicing, producing specimens equal to the finest hothouse products under favorable conditions. It is a very hardy grower. Early, yields abundantly and withstands unfavorable weather conditions, even when most sorts fail. When ready to ship the shape averages as in cut; color dark green with pale green stripes from the blossom and about one-third the length; flesh white and crisp, of excellent flavor; length about 7 to 8 inches. No sort produces more uniform fruits. Many single customers purchase from 100 to 500 pounds, and some more. Large lots in 1-pound sealed cloth bags. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots; 75c per lb. in 100-lb. lots. Post or express prepaid.

Davis Perfect Cucumber Burrell's Special Stock

Seed Supply Very Short

This very valuable new sort was introduced in 1906, and I immediately secured from the introducer a considerable quantity of the seed. This I carefully planted and from the crop I selected the finest specimens for stock seed. I have kept up this selection each year and this year I grew a large acreage and am pleased to say I have seed of this valuable sort to offer to my customers at prices which surely merit your orders when you consider it is one of the best possible to secure. The cucumbers shown in the photo below are Davis Perfect. This cucumber is exactly the same color as Burrell's Klondike, being dark green. Length

about 10 inches when suitable to ship, and size quite uniform. It is an excellent sort either for hot house or outdoor culture.

Grown out of doors the color resembles hot house grown stock and it sells well in competition with them. Price—5c per pkt.; 15c per oz.; 55c per ¼ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots. Post or express prepaid.

If you can club with other growers and buy in 500-pound lots and up write for special offers.

Improved Long Green Cucumber

My stock of this sort is very fine. The long, dark green cucumbers when suitable for slicing are 10 to 12 inches long, crisp and of the finest quality. This is a very heavy yielder and not to be compared with the ordinary Long Green as it is a great improvement on that sort.

The matured fruits are often 15 to 18 inches long. This is a heavy yielder and for those growers whose market calls for an extra long sort it will prove very profitable. Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots. Post or express prepaid.

Buist's Perfection White Spine Cucumber

This stock is my own growing from the introducer's stock and as it is grown under our ideal soil and climatic conditions, you are sure of as fine stock as it is possible to get of this well-known strain. Thousands of pounds of this seed are planted each year by Southern planters.

In shape and size it is between Burrell's Klondike and Burrell's Earliest of All. I have grown a fine crop this year and offer you a special opportunity. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 75c per lb. in 10-lb. lots. Post or express prepaid.

BURRELL'S SPECIAL DARK GREEN ARLINGTON. This long, dark green selection of the Arlington White Spine is a favorite with market growers in many sections. They produce an abundant crop, look well in market, and hold their attractive appearance a long time. I have prepared for a large demand and have nearly twenty thousand pounds of this seed which I grew this year. Price—5c per pkt., 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.; \$1.40 per lb. in 10-lb. lots. Prepaid.

EXTRA EARLY WHITE SPINE. This type is about midway between my Klondike and Earliest of All; the quality is excellent. Very good for small pickles, dill pickles or slicing. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb.; 70c per lb. in 10-lb. lots. Prepaid.

Improved
Long
Green
Cucumber

A careful canvass of the large growing sections of the South indicates that for crop 1921 OVER ONE-HALF of the total acreage to be planted to Cucumbers will be BURRELL'S EARLIEST OF ALL. There is no better slicer. It is very early. All that can be wished for in color. An excellent slicer. Dills well, and makes good solid small pickles. Burrell's Earliest of All Cucumber is the BEST ALL PURPOSE CUCUMBER GROWN. See page 20.

CUCUMBERS

Westerfield's Chicago Pickle

My stock of this variety illustrated below is very fine. The fruits are shaped as shown in cut. Medium length, with large, prominent spines. Color a deep green, very prolific and excellent for pickles either for short bottle pickles or dill pickles.

This variety is planted very extensively for the above purposes by large pickling concerns. Note the special prices on 100-pound lots. If you plant larger quantities, write for special wholesale prices. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Prepaid.

Early Short Green

This variety is also known as Early Frame. It is very early; the fruits are square-ended, uniform in shape, very firm, crisp and tender. Used very extensively for pickling, either for short bottle pickles or for dill pickles.

It yields a heavy crop, the fruits being set at practically every joint on the vine. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Prepaid.

Boston Pickling

Another excellent pickler; a favorite with pickle growers. I often sell 2,000 to 3,000 pounds at a time to large picklers. Very productive fruits, small, shaped like Chicago Pickle, but with less prominent spines. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up, post or express paid.

Snow's Pickling

This early, square-ended sort is one of the finest varieties for pickles and many of the largest picklers use this seed exclusively. It is a selection from Chicago Pickle, which is a little shorter and more nearly square-ended.

My stock is carefully grown from the best of stock seeds, and is such as will please the most critical trade. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots, prepaid.

Early Cluster

Vines vigorous, producing the bulk of the crop near the roots in clusters. Fruits thick, square-ended and uniform. A very productive and valuable sort for pickles. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up. Post or express paid.

Early Siberian

One of the earliest sorts grown; only 3 or 4 inches long when fully ripe. Excellent for bottle pickles. Produced in clusters of two and three at practically every joint on the vine; very solid and crisp. Very few seeds. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up. Post or express paid.

Gherkin

Not cucumber proper, but a little, rough, prickly fruit that grows on a pretty vine with leaves something like a watermelon vine; well liked for pickling. Price—5c per pkt.; 15c per oz.; 40c per ¼ lb.; \$1.50 per lb. Post or express paid.

If there are a number of Market Growers in your district and you can get up club orders for several hundred pounds of Cucumber seeds write for my special offer.

SWEET CORN

Nothing much better than roasting ears fresh from your own garden.

Country Gentleman

This variety produces long shoe peg kernels without rows. It is the sweetest of the sweet corns and no finer roasting ear is grown.

Having no rows, it is an excellent sort to grow where worms bother the ears, as instead of following a row into the center of the ear, thus spoiling it, they have no row to follow, and instead work around the end of the ear, which can be cut off, leaving the balance of the ear suitable for use. Price, postpaid—10c pkt.; 40c per lb.; 35c per lb. in 10-lb. lots. Prepaid. Not prepaid, 25c per lb.

Stowell's Evergreen Sweet Corn

This is the leading standard variety for home use, market and canning. My stock is most carefully selected and can be depended upon to produce fine large ears of superior quality. The stalks are of strong growth, each producing two large ears. The grains, while of good size, are long and slender, the cob being small. The grains are of rich, sugary flavor and retain their fine quality until quite advanced. My stock is entirely free from glaze or flintiness; the dried grains are much shriveled. Price—10c per pkt.; 40c per lb.; 35c per lb. in 10-lb. lots, prepaid; 25c per lb. not prepaid.

Nothing can take the place of ROASTING EARS in their season. Don't fail to can a lot of Sweet Corn and here I want to say that for our home canning we tie to Golden Bantam. Good! I'll say it is. I am not greedy but as with new Peas, so with Green Corn. I LIKE A LOT.

Golden Bantam

GOLDEN BANTAM SWEET CORN

This variety matures very early—60 to 70 days, depending upon climate. This is one of the sweetest corns; the stalks grow from 4 to 5 feet and produce two to three ears to the stalk. The ears are eight-rowed and whether eaten from the cob or canned the quality is excellent. When corn canning time comes Mrs. Burrell takes the time to superintend the work personally and the Pressure Cooker is kept busy until there is enough of this fine variety Golden Bantam canned and stored in our cellar to supply our table until Roasting Ear time comes again.

I want the garden of every one of my customers to contain some of this excellent variety. Price—Pkt., 10c; lb., 40c; 10 lbs., 35c per lb., prepaid. Not prepaid, 25c per lb.

POP CORN Australian Hulless

Also Called Japanese Hulless

The Australian Hulless is a dwarf growing, heavy yielding variety; the ears are very thick in proportion to their length. The kernels resemble the best White Rice and pop larger and without hull. The flavor is excellent. The markets call for this variety at much higher prices than the old varieties of pop corn. This is the best sort to plant. Price—10c per pkt.; 25c per ½ lb.; 45c per lb., postpaid. Not prepaid, 35c per pound.

Queen's Golden Pop Corn

This is the largest sort and produces abundantly. The grains are a rich golden color, and are creamy white when popped, and a single kernel will expand to nearly an inch. Price—10c per pkt.; 30c per lb.; 25c per lb. in 10-lb. lots, prepaid. Not prepaid, 15c per lb.

White Rice Pop Corn

A well-known variety. I offer a very fine strain which produces larger ears than usual and yields very heavy crops. The quality is excellent. Price—10c per pkt.; 30c per lb.; 25c per lb. in 10-lb. lots, prepaid. Not prepaid, 15c per lb.

EGG PLANT

The Egg Plant should be more generally grown, for when well grown and properly cooked is a most delicious vegetable. The seeds germinate slowly and should be started in a strong, uniform heat, and kept constantly growing, because the young plants seldom recover if checked in their growth. Sow seeds in hot beds or warm greenhouse in March or early April; if no hot bed is at hand they may be grown in any light room where the temperature will average 75 degrees. When plants have formed two rough leaves, transplant them in beds 3 or 4 inches apart. Keep the bed closed and very warm, shading from the direct rays of the sun, giving an abundance of water until the ground is warm and all danger from frosts and cold nights is past, then harden the plants by gradual exposure to the sun and air, then increase the supply of water; transplant to the open ground late in May or June into warm, rich soil, 2 or 3 feet apart each way, according to the richness of the soil. When about a foot high draw the earth up to the stems. Care should be used in cutting the fruit so as not to disturb the roots of the plants. One ounce for 2,000 plants; 4 ounces for one acre.

Burrell's Special Gardener's Stock New York Improved Spineless Egg Plant

My seed of this fine variety of egg plant has been selected for many years to a certain type until it is as fine as can be purchased from any source. The finest specimens from the most productive plants have been selected for stock seeds each year. The fruits are shaped as shown in cut and under favorable conditions measure 6 to 8 inches in diameter. The skin is a handsome, dark purple, flesh, white, quality excellent. Market growers who plant largely will find this very desirable. Price—10c per pkt.; 50c per oz.; \$1.60 per ¼ lb.; \$5.00 per lb., postpaid.

DILL

Dill is used extensively by Pickle Packers in putting up Dill Pickles. This plant is easily grown and should be in many more gardens than has been heretofore. Price—10c per pkt.; 15c per oz.; 30c per ¼ lb.; 80c per lb. Special prices quoted on large lots.

Herbs, Sweet, Pot and Medical

The following at 10c per pkt., postpaid:

Caraway, used for flavoring.
Coriander, useful culinary plant.
Cumin, used for flavoring.
Fennel, for medicinal purposes.

Sage, used for flavoring.
Lavender, popular aromatic.
Marjoram, used for seasoning.

Thousands of the most successful planters of the U. S. plant my garden seeds each year. Your orders will be carefully filled and I will try to merit future orders.

LETTUCE

The most used of all salads; is of easy culture, requires rich, moist soil and clean cultivation, on which depends its appearance, tenderness and flavor. For early spring use, sow in a seed bed in September or October and protect through the winter in cold frames, or in the South with leaves or litter, or sow in a hot bed in early spring; as soon as the ground can be well worked, transplant in good rich ground to rows 18 inches apart and 8 inches in the rows. For a later supply plant every two weeks from the middle of April until July, choosing varieties according to their heat resistance. Sow in drills $\frac{1}{4}$ inch deep, 18 inches apart, and thin large varieties to 12 inches apart in the rows. Ounce of seed makes 2,500 plants. Lettuce is divided into three classes:

First—Curled or Loose Leaved, which produce a large, loose bunch of leaves which curl beautifully and are very tender and crisp. Pretty for garnishing. These sorts are most sown for very early spring use.

Second—Heading or Cabbage Varieties, which produce heads resembling cabbage. Some of these grow to very large size and are the main crop market sorts for outdoor gardens.

Third—Cos or Celery Lettuce, with long head, erect and narrow leaves which blanch very quickly.

Cabbage or Heading Varieties

New York or Wonderful Lettuce

This variety is also known as Los Angeles Market or New York Special. This is the variety planted so extensively in California and shipped all over the U. S. You can grow this fine sort in your own garden. If for market thin so the plants stand from 12 inches to 15 inches apart in the rows, with rows 18 inches to 20 inches apart.

It is one of the largest of the heading varieties, curled and crisp; blanches white; the large, solid heads often weigh 2 pounds or more each. Price—10c per pkt.; 20c per oz.; 70c per $\frac{1}{4}$ lb.; \$2.20 per lb.; 10-lb. lots \$2.10 per lb. Delivered free. By express at purchaser's expense, \$2.00 per lb.

Selected Market Gardener's Big Boston Lettuce

This is a very desirable variety for forcing or outdoor culture. The heads are large and of fine quality. Planted very extensively South to ship North. Many of my customers purchase 5 to 10 pounds each of this excellent variety. Equally good for home or market gardens. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 95c per lb. in 10-lb. lots and up. Delivered by mail or express.

Improved Hanson. This is a standard summer lettuce; none more reliable for outdoor cultivation. The heads grow to a remarkable size, and are very solid. The outer leaves are a bright green, while the inner head presents a white appearance, as though blanched; tender and crisp and free from any unpleasant bitter taste. It is very slow to seed, and is an ideal summer lettuce. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 5-lb. lots. Delivered by mail or express.

The New Burrell Lettuce

Florida Growers Report This Sort Superior to All Others

I secured this valuable lettuce from a specialist in France and introduced it in 1909. It won favor wherever planted. It comes up strong and grows rapidly. The outer leaves are bright green, curled and crinkled. The inner leaves blanch creamy white and are very tender and of finest quality.

I planted this in a check test with a large number of sorts and it remained solid and in excellent marketable condition after many of the "long-standing" sorts had passed the marketable stage and gone to seed. Price—10c

per pkt.; 25c per oz.; 85c per $\frac{1}{4}$ lb.; \$3.00 per lb. Delivered free.

Early Prize Head. This popular variety produces large, loose heads of finely crimped and fringed leaves, the outer portions of which are shaded with brown. Exceedingly crisp, sweet and tender. One of the best for the home garden. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 5-lb. lots. Delivered free.

Trocadero. Very popular in the South to grow for shipping North. The large heads blanch beautifully and are of superior quality. It heads well in the cool weather of Fall or Spring for out-of-doors planting. Trocadero is also a fine forcing variety for cold frames during the Winter. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 95c per lb. in 10-lb. lots. Delivered by mail or express.

"Trianon" Cos or Celery Lettuce. This lettuce excels all other sorts in quality, having a crispness, tenderness and flavor peculiar to itself and not equaled by others. The heads are long and pointed. The outside leaves should be drawn over the top and tied, when they soon form solid heads and blanch quite white and become crisp and sweet as celery stalks. It may be eaten like celery or prepared as a salad. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 5-lb. lots. Delivered free.

Curled or Loose Leaved Sorts

Grand Rapids Forcing. There no better forcing variety among the curled-leaved sorts than the Grand Rapids, and it is quite as good for outdoor culture as other sorts. Large, beautiful leaves, very crisp and tender. Twenty to 30 pounds have been raised from a common sash, and three crops taken off the ground. Frequently a house full of this lettuce will average $\frac{1}{2}$ pound to the plant, and occasionally a plant will weigh 1 $\frac{1}{2}$ pounds. Excellent for shipping and will insure sales at sight. The soil cannot well be too rich. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 10-lb. lots. Delivered free.

Black-Seeded Simpson. The most popular sort of all the non-heading varieties. One of the best for use under glass as well as for early outdoor planting. The plants form large, loose heads; outer leaves a light yellowish-green, with inner leaves blanched and almost white. Resists the heat and remains long in a good edible condition. For this reason it makes a popular variety for all market gardeners' use. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 5-lb. lots. Delivered free.

Early Curled Simpson (Silesia). Forms a close, compact mass of leaves that are large and broad, crimped and blistered and light green in color. Not desirable for forcing with bottom heat. It is, however, recommended for planting in cold frames, and extensively grown in the open. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 5-lb. lots. Delivered free.

Growing and Harvesting Rocky Ford Cantaloupes

With the subject of growing and marketing cantaloupes, Rocky Ford, Colorado, is very closely associated, because here was the birthplace of the industry, and from here the industry has spread to all parts of the country and beyond its borders, until cantaloupes have become a staple product; plantings for market now aggregating approximately 100,000 acres.

The season begins from Old Mexico and extends through southern California, southern Texas and southern Florida with first shipments in May, and gradually extends northward until the last shipments of the year come from Colorado, during August and September, and continuing sometimes as late as October 15th.

The Netted Gem, from which all the "green-meated" strains have been developed, was the first planted. This melon was nearly round, rather deeply ribbed and almost inclined to be flattened from stem to blossom, heavily netted on the ribs, but without netting across sutures between the ribs, the blossom end well protected, meat green, spicy and very sweet.

From this melon selections were made to a longer type, resulting in the Thoroughbred Rocky Ford cantaloupe, which retains all the original fine eating qualities and has a very desirable shape for crating.

This variety is not grown extensively for market, as later selections, while not of such high flavor, have deeper meat, better netting and are much better shippers.

Another selection developed a type slightly more nearly round and earlier, known as the Early Watters' strain. This is the earliest strain grown, but does not succeed well in districts where the vines are inclined to rust. Its chief point of merit is extreme earliness. It sets a very heavy first crop and ripens them within a few days after the first begin to ripen. While with this sort some growers get big returns because of the extreme earliness, the quality soon runs down, and, as some growers will not consider the effect of shipping poor melons, they send them out after the quality is poor and by the time the trade finds they are not good, these early shippers are through and have their money, and later shippers must suffer. For this reason I suggest going slow on this strain unless there is no tendency whatever for vines to rust in your district.

Rust Resistant Strains

Later selections developed the Eden Gem and the Pollock, from which have been brought to a high state of perfection the Gold-Lined Netted Rock, a melon entirely covered with a closely laced, gray netting; green meat extending almost to the seed cavity, lined with a rich golden portion. This melon is highly flavored and a good shipper. It is highly rust-resistant.

Salmon-Tinted Pollock No. 25 is from the same source. It has the same highly developed netting and shape. The meat is one-half green next to the rind and one-half salmon next to the seed cavity. It also is highly rust-resistant and an excellent shipper.

Of the red or salmon-meated varieties, there is the Burrell Gem. The Burrell Gem now has an established place on the market. Over 1,000 cars of these are shipped out of Colorado each year which meet with good sale. This melon is of recent introduction, the first being marketed in 1904. In size it is larger than the Rocky Ford. This melon is well netted, has deep meat or sweet, spicy flavor and is an excellent shipper. They will not do well where there is much rain, as this will cause them to crack.

In growing melons for market, the first step is to get seeds of the best possible quality, as without good seed there can only be one result—failure.

The land should be a sandy loam, well supplied with humus. A heavy oat stubble plowed under is one of the first locations. Green rye is apt to sour the ground and give poor results. In the young orchard sow vetch in the fall and turn it under two or three weeks before time to plant the melons, and you have stored up in the soil as much fertilizer value as you could purchase in commercial fertilizers for \$20 to \$40 per acre and above this have an abundance of humus. The orchard is benefited and you should produce a profitable crop of melons.

Prepare a deep, finely pulverized and well settled seed bed. Plant ten to twelve seeds to the hill, close together, if the soil is inclined to crust, as one plant will help the other raise the crust, and the strongest should be left in thinning. Cover the seed about 2 inches deep. If hills 4 feet each way, thin to one plant when they have five to six leaves; if 6 feet each way, thin to two plants to the hill.

Cultivate frequently, deep away from the plants, but shallow close to them. When hoeing remove the crust from around the plants and replace with fine, loose soil.

Many Rocky Ford growers have sold over \$500 worth of melons per acre. The demand for good melons is increasing rapidly and the gross sales now amount to many millions of dollars a year in the United States.

Growing and Harvesting Rocky Ford Cantaloupes—Cont'd

If under irrigation, they should be watered regularly about every two weeks and the watering continued through the ripening season to keep the vines thrifty. Many do not irrigate during the ripening season, with the result that after a couple of weeks the melons ripen prematurely and are of poor quality.

Do not pick the melons until they will slip from the vines. This will be indicated by a slight change in color, and for long distance shipping it is necessary to observe very closely so you get the melons just as soon as the melon is ready to slip from the vine with a light pressure. As the season advances they should be picked very close. Many pick what they call half-slip, i. e., when part of the stem lets loose with a light pressure; they break off the balance. This requires very close care not to get melons which are not yet sweet.

It is necessary to pick every day to get best results.

The most extensive growers follow the pickers with a wagon and extra picking bags, and as soon as a bag is filled it is laid upon the wagon and an empty one taken. When the wagon is loaded it goes to the packing shed and another takes its place. Smaller growers provide sleds drawn by one or two horses instead of wagons.

A trough with a canvas or burlap bottom is provided at the packing shed and the melons are very carefully taken from the bags and placed in the trough for packing.

The standard crate for the green-meated sorts is 12x12x24 inches, which contains forty-five cantaloupes. The smaller cantaloupes are usually crated in pony crates, 11x11x24 inches, which contain fifty-four melons. As a rule, however, the small melons are of poor quality and if no pony crates were shipped the result would be favorable to the industry.

The melons are carefully inspected before crating for proper development and none but good melons packed, care being taken to have the pack tight.

The usual plan is to make the crate complete with the exception of nailing slats on top. A bench is provided on which the empty crate is placed, the end of the crate toward the packer being three or four inches lower than the other. The first melon is taken from the trough, being partially inspected as the hand moves to pick it up for proper maturity. It is turned over and inspected for defects as it passes from one hand to the other, and is placed in the lower left-hand corner of the crate. The second melon is placed in the center of the lower end and the third in the right-hand corner, making a tight fit. Then the second cross row on the bottom is laid, and so on until the bottom tier is packed. Then the second and third tiers are packed in the same manner. The expert crater can tell the size needed at a glance and seldom ever picks up a second melon to fit unless the first is a cull and must be thrown away. Cantaloupe varieties are now so highly improved that there are practically no culls in well grown fields.

Make it a rule to pack only such melons as you would wish to buy.

You can put up a very full pack by soaking the slats which you nail on top after filling the crate, as they then bend easily.

The Burrell Gems are packed in flat crates containing only one layer. Size of crate, 13½ inches wide, 4½ inches deep and 24 inches long, which contains twelve standard or fifteen smaller melons. This melon should be wrapped, each being wrapped separately in special wrapping paper. Pink is the best color.

Forty acres is about the least that should be planted for car-lot shipments and where a grower plants less than this he should be able to join with other growers to make up car lots unless he is near markets where his crop can be disposed of by local express shipments.

An average yield per acre of the Rocky Ford variety with the better growers is 150 standard crates per acre, with an extreme yield of 400; of the Burrell Gems, 450 flat crates, with an extreme of 900 flat crates.

The average price per crate net to the grower varies with the season and quality of the product from 70 cents to \$3 per crate for standard crates of the Rocky Ford variety, and 30 cents to \$1.25 per crate for the flat crates of the Burrell Gem variety.

Nearly the entire cantaloupe crop of the country is marketed by specialists who distribute to the different markets, keeping close wire connections with all, to be able to place the melons where there is greatest demand and avoid over supplying any and failing to supply others. The distribution is a very important factor, but the quality of the pack has most to do with the success of the grower. If the melons are right, they always sell quickly and command top prices.

Salmon Tinted Pollock 10-25

This strain was developed from the Salmon Tinted Pollock No. 25. The originators planted a large number of plats from single melons and plat No. 10 produced this melon, which accounts for the name.

The melons run from Standard to Jumbo, packing in standard crates and flats. This is an advantage, there being no pony melons.

The melons are solidly netted, without ribs, very uniform in size and shape, do not develop soft spots and can be picked closer than other types of Rocky Fords.

The flesh is very deep, fine grained and more Salmon colored than No. 25.

Being an excellent shipper and highly rust-resistant it is a leading favorite with market growers and is being planted very extensively at this time.

My stock was grown from the originator's finest stock seeds and carefully hand cut. I offer the seed at as low prices as seed of such quality can be offered. Price—10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; 25 lbs. and up, \$1.25 per lb.

Salmon Tinted Pollock No. 25 Cantaloupe

This melon has been grown for market only five years extensively, and it has won a good reputation as one of the very best for long-distance shipping.

The vines are highly rust-resistant. The meat of very fine texture is deep and firm. Color of meat green one-half the depth from the rind, the remaining one-half a rich salmon, giving it an attractive appearance.

The netting is closely laced and interlaced, there being a subnetting underneath the outer netting.

The size runs from standard to jumbo and it yields a very heavy crop. This is the favorite sort with California growers. I offer the seed in two grades:

Stock Seed Salmon-Tinted Pollock No. 25—Saved from the finest of the first melons to ripen. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Express paid.

Standard Seed Salmon-Tinted Pollock No. 25—Saved from standard size selected melons. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots and up. Express paid.

BURRELL'S SELECT GOLD-LINED NETTED ROCK OR NETTED ROCK KING is a very valuable market sort. It possesses the necessary points of solid, closely laced netting, deep meat, green nearly the full depth, with a **golden lining**. The flavor is excellent. It will hold up to ship to the farthest markets, and the vines are highly rust-resistant. The size runs from standard to jumbo, and the markets are now calling for flat crates packed 12's at a premium in price.

I recommend this sort to market growers and associations. My stocks are of the best to be had.

Stock Seed saved from the best of the first to ripen. Price—10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb. Delivered free.

No. 1 Seed from good melons grown only for seed. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lbs. and up, 85c per lb. Delivered free.

Burrell's Improved Watters' Solid Net Rocky Ford Cantaloupe

EXTRA EARLY

DO NOT PLANT THIS VARIETY IF VINES RUST IN YOUR DISTRICT

This **SOLID NET** Cantaloupe is the earliest strain of Rocky Ford Cantaloupe. It sets a very heavy first crop so that in a few days after the first crop begins to ripen large pickings are getting ripe. The netting is well developed, gray, and closely laced. The flesh is light green and of excellent quality. The seed cavity is some larger than either of the strains previously listed. Price—Stock Seed saved from the best earliest melons—10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up.

No. 1 Seed saved from good melons grown only for seed—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots and up. Above prices include free delivery.

Salmon Tinted Pollock 10-25

See description and prices, page 31

This valuable sort is now the leading favorite with market growers on account of its uniform size and shape. Well developed netting, deep, fine grained, Salmon-colored flesh of excellent flavor, heavy yielding and long carrying qualities. It may be said to combine the best qualities of all the other cantaloupes.

The Burrell Gem Cantaloupe

ALSO CALLED PINK MEAT

I first introduced this now famous melon on the market in 1904, marketing forty-one baskets. In 1905 I grew twelve acres for market and sold \$6,000.00 worth of melons from this field. In 1906 I placed them on the Chicago and New York markets, where they sold for two to three times as much as any other melons. They have continued to keep up this good reputation, and this year several thousand cars were shipped from different growing sections, which brought top prices.

The crate now being used for the standard melons measures 24 inches long, 13½ inches wide, 4½ inches deep, and holds 12 melons, or 15 smaller-sized melons. About 80 per cent of my melons run 12 to the crate. The small melons, 15 to the crate, do not sell as well, and it is quite an advantage to get as many 12's as possible.

This is an abundant yielder, often producing 15 to 25 melons to the hill. The meat is rich golden color, very thick, and fine-grained. The flavor cannot be excelled. The seeds are closely held in place in three lobes and do not easily shake loose. The rind is covered with a closely laced gray netting, except the narrow stripe between the ribs, which is not netted. The blossom end is well protected. Shape oblong, averaging six inches long and tapering at the ends. It is an excellent shipper and will carry nearly two weeks without ice.

I do not recommend it for planting where there is excessive rainfall, as this will cause them to crack. Be sure to get your seed from me.

This past year returns as high as \$1,000.00 per acre were obtained here at Rocky Ford for melons shipped to eastern markets of this variety.

STOCK SEED BURRELL GEM—The Finest Possible Selection.

Price—5c per pkt.; 15c per oz.; 50c per ¼ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb.

No. 1 SEED BURRELL GEM, saved from fine, well-netted melons. I recommend this seed to market growers as being very desirable. This melon has brought hundreds of growers profitable returns. It will pay you to give it a trial, for if it is adapted to your soil and climate you will be well paid for your efforts.

Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 10 lbs. and up, 85c per lb. Above prices are delivered by express.

Improved Hoodoo—Oblong Type

This melon when first introduced averaged shorter from stem to blossom than from top to bottom. I have carefully selected to an oblong type and now offer seed from my fields which average fully 90 per cent of the oblong type. This has resulted in a deeper meat and a very desirable shipper. Size a little larger than the standard Rocky Ford. Color of meat a rich orange, flavor very good. It is an excellent melon, and I recommend that you give it a thorough trial.

Price—5c per pkt.; 15c per oz.; 45c per ¼ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb. Delivered by express.

Anne Arundel Musk Melon

This very early variety is well netted, has deep green meat of very fine flavor, close grained and firm, making an excellent market melon. Not suitable to ship in standard crates, as it is too large—4 to 6 pounds.

Many report excellent crops from it, and those who have short seasons say it is their best sort.

Price—5c per pkt.; 15c per oz.; 45c per ¼ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Delivered by express.

Burrell's New Golden Honey Dew

A money-maker for growers in the semi-arid and irrigated sections. This is the third year I have offered this melon, and now I am pleased to say it has won through merit a place for itself on the markets and with good judges of a first class melon, so that it must be considered one of the money-making sorts to grow in the leading melon-growing sections. The shape is as illustrated above. Size slightly smaller than the Green Meated Honey Dew.

Burrell's Golden Honey Dew has rich golden flesh, which is deep and very sweet. It combines the spicy flavor of Emerald Gem with the sweetness and long-keeping qualities of the original Honey Dew. I have already sold to large planters a large portion of my seed at \$5.00 per pound in 100-lb. lots.

Order some of this and you should get good results.

Price—10c per pkt.; 40c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$5.00 per lb., prepaid.

Green Meated Honey Dew

During the fall of 1915 the first Honey Dew melons were placed on the market and the product of slightly over two acres netted thirty-six hundred dollars (\$3,600.00) in the Chicago and New York City markets. This year these melons have sold at wholesale for from 35 cents to \$1.50 each on the eastern markets.

The rind is a dull white when ripe. Part of the melons show slight checks in the rind like a tendency to net. This appears when the melon is ready to pick. Time of ripening, about two weeks later than Rocky Fords.

The size runs six to seven inches in diameter from top to bottom and eight inches in length. The matured melons are practically all the same shape and size.

The flesh is a rich green and very sweet. The melon is a good shipper and will keep several weeks, so there is practically no loss from spoiled melons in shipping.

I recommend this melon to market growers. The vines are vigorous and set six to ten melons to the hill, and if proper care is taken to ship only ripe melons a fine market can be established.

My supply of seed is strictly right and grown from carefully selected stock seeds—THE INTRODUCER'S STOCK.

Price—5c and 10c per pkt.; 20c per oz.; 70c per $\frac{1}{4}$ lb.; \$2.50 per lb.; \$2.25 per lb. in 10-lb. lots. Prepaid.

HUNGARIAN CASABA—This melon is the same shape as Honey Dew, but has an orange-colored rind. The flesh is green, very sweet, and the melon will keep several weeks after ripening. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb. Prepaid.

CASABA NEW HYBRID—This valuable melon will keep two to three months after it is matured and picked the first of October and stored in a dry, cool place will keep until Christmas. The quality is very good, and a large demand is growing up in the eastern market. This is the sort most extensively grown in California. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb. Delivered by express.

MUSKMELONS

Emerald Gem Muskmelon

This extra fine variety is worthy of special mention and has but few equals for the home garden, but being without netting and often cracking open when ripe, it is not a good market melon. Medium size, perfectly smooth; skin a deep emerald green with white ribs. Very attractive in appearance. Flesh salmon-colored, very deep and quality almost equal to the Rocky Ford. Do not fail to grow a few. Price—5c pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.50 per lb.

EXTRA EARLY HACKENSACK MUSKMELON

This variety is among the earliest of the muskmelons. The melons weigh from 5 to 8 pounds, are heavily netted and the ribs are prominent. The flesh is pale green and of good quality. Fully two weeks earlier than the Old Hackensack.

Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots and up.

OSAGE MUSKMELON

This is a very popular melon and one of the best, owing to its fine spicy flavor and good shipping qualities. Skin dark green, slightly netted; flesh salmon color. Very productive and a long keeper. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

CHICAGO MARKET MUSKMELON

Large, green-fleshed, heavily netted, quality very good. This is a desirable sort for home or nearby market. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

TIP TOP MUSKMELON

This is a very valuable variety, the rind is slate-colored, fruit nearly round, deeply ribbed. The flesh is deep and salmon-colored, very fine grained and of desirable quality. I would give this much more prominence in my catalog but on account of hail my crop this year is small. Price—10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.

MONTREAL MARKET MUSKMELON

This is a very large melon, with deep pale green flesh, which is often over three inches thick. The flavor is excellent. The melon is well netted and a good shipper. Single specimens from the Montreal, Canada, district often sell at \$1.25 to \$1.50 each on the New York and Boston markets.

These melons often weigh 15 to 20 pounds.

Price—5c per pkt.; 20c per oz.; 65c per $\frac{1}{4}$ lb.; \$2.50 per lb.; 10 lbs. and up \$2.25 per lb. Delivered by express.

Citrons

GREEN-SEEDED COLORADO. Fruit round; an improved variety. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Delivered by express.

RED-SEEDED CITRON. The old variety; good quality. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Delivered by express.

Mustard

WHITE ENGLISH. The leaves are light green, mild and tender when young; seed light yellow. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb. prepaid.

BROWN. Stronger and more pungent than the above. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb. prepaid.

NEW CHINESE OR GIANT SOUTHERN CURLED. Very large leaves ready for use six weeks after sowing. Plants continue to yield until after frost. Leaves are eaten, boiled, like spinach. Price—5c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb. Prepaid.

WATERMELONS

Above is a photograph of one of my seed fields of Burrell's Improved Kleckley Sweet Watermelon. The long row of melons are selected for stock seed. After my men select these melons and pile them in rows I personally go over them and reject all not true to type. This very careful selection is done to keep my seed right. See price of this grade of seed next page.

CULTURE

To successfully grow watermelons it is absolutely necessary to have good seed. Then select proper soil and give it proper cultivation and irrigation (if under irrigation) and if not prepare the land to drain off or retain the moisture, depending upon whether you get much or little rainfall, and the results are usually very good.

Select a well-drained sandy loam; new sod land is best; any good loamy soil which is well drained is good.

If under irrigation run large furrows 8 feet apart and plant the hills well up on the border 8 to 10 feet apart. Be careful not to irrigate too often.

Watermelons are lovers of drouth, and the finest melons are grown under semi-arid conditions.

Plow deep and harrow well to make a fine seed bed. A liberal coat of stable manure disked in before plowing will increase the size and yield.

If not under irrigation, plow the land in ridges by first throwing out a dead furrow, then back-furrowing into the dead furrow four or five furrows from each side, and after thoroughly harrowing plant on the center of the ridge.

Do most of the cultivating with the harrow, setting the teeth straight and cultivating deep.

Keep a fine mulch on the surface and do not let any weeds grow.

Plant ten to twelve seeds to the hill and thin to one plant when they have five to six leaves.

If you use commercial fertilizer mix it thoroughly with the soil around the hill, but do not leave any lumps under the hills where the first roots will reach it, or it will burn the roots and check the growth, if not kill the plant.

Do not plant on land where melons were grown before, even if four or five years before, if you have other good land. The vines remove something from the soil not readily replaced, and following crops usually produce deformed melons with black ends or shriveled ends, even from the best of seeds, while the same seed on adjoining land, where melons have not been grown before, will produce large melons of the finest quality.

Do not press on melons to see if they are ripe. This injures them and results in very poor melons. A slight thump with the finger, if the sound rings clear and a high tone indicates a green melon; if a hollow, low tone, or rather dead tone, the melon is ripe.

Usually the curl where the melon attaches to the vine dies when the melon is ripe. By a little practice you can tell by the color. A bright, growing color indicates a green melon; a dull green indicates ripeness.

The Improved Kleckley Sweet and New Chilian are the finest flavored melons and fair shippers up to 150 to 175 miles.

The New Tom Watson and Alabama Sweet are the finest eating melons of the really good shippers.

Thousands of the finest melon fields of the United States, from Florida to Oregon, from Texas to California, are grown each year from my seeds.

Burrell's Improved Kleckley Sweet Watermelon

No Better Melon Grown

Melons Like These Sold Readily at 50c to 75c Each in 1920. Which Is Equal to \$5.00 to \$7.50 per lb. for the Seed

My strain of this melon is listed by some as the New Hard Shell Kleckley Sweet.

THE MOST DELICIOUS WATERMELON GROWN; VERY PRODUCTIVE AND OF ATTRACTIVE APPEARANCE

Again I offer this strain as the finest eating melon and the thousands of customers who continue to plant it speak volumes in its favor. Some report sales of as much as \$400.00 to \$600.00 per acre, which surely is very good. As it grows with me it is not only the best eating melon, but a good shipper, which holds first place on many markets.

The melon is oblong, ends square, color dark green, flesh deep red, stringless, solid and very sweet with but few white seeds set firmly near the rind.

STOCK SEED BURRELL'S IMPROVED KLECKLEY SWEET WATERMELON

This seed was cut from such melons as are pictured in the pile above. The stock seed melons would average 35 pounds each.

Last year I could not fill all orders and this year I planted a large acreage hoping to be able to supply the demand but unfortunately part of the acreage was destroyed by hail. I saved only one small field not injured by hail and therefore my supply of this grade of seed is short. I cannot furnish over five pounds on any one order. Price—20c per pkt.; 40c per oz.; \$1.50 per ¼ lb.; \$5.00 per lb. Not over 5 lbs. to one customer.

NO. 1 SEED BURRELL'S IMPROVED KLECKLEY SWEET WATERMELON. Saved from desirable melons grown from same stock seed as above. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.25 per lb.; \$1.10 per lb. 10 lbs. and up. Delivered by express.

THE NEW TOM WATSON WATERMELON

This large mottled green watermelon often weighs 50 to 60 pounds and averages on good soil over 30 pounds. It has, within the past five years, won place among the very first as a market melon. The flesh is deep red and contains very few seeds, which are firmly bedded. It is the leader, taking into consideration size, shipping and eating quality. I have very carefully selected my stocks and have excellent seed to offer. Your orders will be placed where you should get excellent results if you buy this seed from me.

This picture was sent to me by Mr. A. A. Lane of Mississippi. He writes that this melon was grown from my seed and that he "sold 1,500 off of an acre and a quarter." At \$1.50 for this melon he got at the rate of \$15.00 per pound for the seed as it takes 10 melons to cut a pound of seed. Of course all his melons did not bring \$1.50 each, but it is safe to say he obtained a big return per acre.

For the most critical planters I have selected the following:

STOCK SEED, NEW TOM WATSON WATERMELON. Cut from melons just like shown in the cut, which would average 40 pounds or more. All ideal types. Nothing finer can be grown. Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per pound straight on larger lots. Delivered by express.

No. 1 seed New Tom Watson Watermelon grown especially for seed and cut from good shippers. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10-lb. lots and up, 85c per pound. Delivered by express.

BURRELL'S SELECT ALABAMA SWEET WATERMELON

This is a fine shipper. My seeds are planted extensively by many of the most successful Texas and other Southern melon growers.

The rind is dark green, marked with still deeper green mottled stripe, and while thin, it is very tough, making the melon a first-class shipper. The flesh is bright red, fine-grained, sweet and luscious, entirely stringless and very firm. The seeds are white, slightly tipped with brown, and are firmly set in small cavities near the rind.

My crops were as fine as I believe it is possible to grow. I saved especially for stock seed a considerable quantity of this seed from 35 to 40-pound melons, and offer:

STOCK SEED BURRELL'S SELECT ALABAMA SWEET from above described selection at 5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.85 per lb. 10 lbs. and up. Delivered by express.

NO. 1 SEED BURRELL'S SELECT ALABAMA SWEET. Grown exclusively for seed and cut from fine melons. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 60c per lb.; 55c per lb. 10 lbs. and up. Delivered by express.

Don't Overlook Golden Heart

Golden Heart

This delicious new melon averages about twenty pounds, is shaped as shown in cut and the flesh is the color of rich ice cream made of real cream; the flesh is without stringiness, fine-grained, melting and very sweet. Everyone who enjoys a sweet, luscious watermelon will be well pleased with this.

Above was my first description. My customers say I did not claim enough for it; that they "average thirty pounds, and are the finest melons we ever tasted." I saw these melons sell for 40 cents each when other melons were selling for 15 cents, and can recommend them for every home garden and for market growers who are near markets. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Express paid.

Select New Chilian Watermelon

This is the favorite melon in California and especially in the southern part, where large profits are made growing it.

My strain of this melon produces all white seeds. Some others produce mixed white and pale red seeds. Extreme care has been taken to make my strain the best possible and my crop was as fine as could be desired.

The rind is thin and tough. The white seeds are set near the rind; heart bright red, stringless and of excellent quality. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; \$9.00 per 10 lbs.; 85c per lb. 40 lbs. and up. Delivered by express.

Florida Favorite Watermelon

This is another variety on which my trade is very large, and I have increased my acreage to take care of this demand. A beautiful melon with light and dark green exterior; shape oblong; flesh bright crimson; crisp and deliciously sweet. It is only a few days later than the first early sorts and a good shipper. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 80c per lb. 10 lbs. and up. Delivered by express.

Winter Queen

This round light green striped with darker green melon has a very thin, tough rind, rich red flesh and few small black seeds set very firmly in the flesh near the rind. It will keep well until mid-winter and is a great treat after all other watermelons are gone. Price—10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.85 per lb., postpaid.

Georgia Rattlesnake

An excellent market variety; large and oblong; rind mottled and striped; a well-known shipping melon. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 80c per lb. in 10-lb. lots and up. Delivered by express.

Cole's Early. This is one of the earliest melons and is a very hardy, sure cropper; medium size; slightly oblong shaped; rind green, striped with lighter shades; flesh dark red. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

ONION

In onion culture thorough preparation of the ground, careful sowing and the best of after culture, though essential for a full yield, will avail nothing unless seed of the best quality be used. Given the same care and conditions, the product from two lots of onion seed of the same variety but of different quality may be so unequal in the quantity of merchantable onions that it would be more profitable to use the good seed though it cost twenty times as much as the other. The seed I offer is the best obtainable. Although onions are often raised from sets and from division, by far the best and cheapest mode of production is from seed. The facility with which seed is sown and the superior bulbs it produces, recommend it for general use.

HOW TO RAISE ONIONS

THE SOIL. A crop of onions can be grown on any soil which will produce a full crop of corn, but on a stiff clay, very light sand or gravel, or on some muck or swamp lands, neither a large nor a very profitable crop can be grown. I prefer a rich loam with a slight mixture of clay. This is much better if it has been cultivated with hoed crops, kept clean from weeds and well manured for two years previous, because if a sufficient quantity of manure to raise an ordinary soil to a proper degree of fertility is applied at once, it is likely to make the onions soft. The same result will follow if we sow on rank mucky ground or on that which is too wet.

MANURING. There is no crop in which a liberal use of manure is more essential than in this, and it should be of the best quality, well fermented and shoveled over at least twice during the previous summer to kill weed seeds. If rank, fresh manure is used, it is liable to result in soft bulbs with many scallions. Of the commercial manures, any of the high-grade, complete fertilizers are good for ordinary soils and even very rich soils are frequently greatly benefited by fine ground bone, and mucky ones by a liberal dressing of wood ashes.

PREPARATION. Remove all refuse of previous crops in time to complete the work before the ground freezes up and spread the composted manure evenly at the rate of about twenty tons to the acre. This should first be disced in and then the ground ploughed a moderate depth, taking a narrow furrow in order to thoroughly mix the manure with the soil. Carefully avoid tramping on the ground during the winter. Disc thoroughly as early in the spring as it can be worked, after which the entire surface should be made fine and level with a smoothing harrow. It is impossible to cultivate the crop economically unless the rows are perfectly straight.

SOWING THE SEED. This should be done as soon as the ground can be made ready and can be done best by a hand seed drill. This should be carefully adjusted to sow the desired quantity of seed about one-half inch deep. The quantity needed will vary with the soil, the seed used and the kind of onions desired. Thin seeding gives much larger onions than thick seeding. Four or five pounds per acre is the usual quantity needed to grow large onions. I use a drill with a roller attached, but if the drill has none the ground should be well rolled with a light hand roller immediately after the seed is planted.

CULTIVATION. Give the onions the first hoeing, just skimming the ground between the rows, as soon as they can be seen in the row. Hoe again in a few days, this time close up to the plants, after which weeding must be begun. This operation requires to be carefully and thoroughly done. The weeder must work on his knees astride the row, stirring the earth around the plants, in order to destroy any weeds that have just started. At this weeding or the next, according to the size of the plants, the rows should be thinned, leaving from eight to twelve plants to the foot. In ten days or two weeks they will require another hoeing and weeding similar to the last, and two weeks later give them still another hoeing and if necessary another weeding. If the work has been thoroughly done at the proper time, the crop will not require further care until ready to gather.

GATHERING. As soon as the tops die and fall, the bulbs should be gathered into windrows. If the weather is fine they will need no attention while curing, but if it is not they will need to be stirred by simply moving them slightly along the row. Cut off the tops when perfectly dry, about half an inch from the bulb and then after a few days of bright weather the onions will be fit to store for winter.

It will not do to store onions in large piles or masses, particularly in warm weather, or if they are the least moist, but if perfectly dry when gathered and they are spread not to exceed two feet in depth, they can be kept in fine condition till spring. Any arrangement will answer that will keep them dry and at a uniform temperature of about 32 degrees Fahrenheit, or they may be kept frozen, care being taken not to disturb them. They should be thawed gradually. Repeated freezing and thawing will spoil them.

If bothered with thrip (a small insect which sometimes attacks onions, doing great damage) spray with a tobacco emulsion. Three sprayings will usually completely control them.

Very early onions are grown by the transplanting method, the seed being sown in frames or beds and the small onions transplanted when the size of small lead pencils to the field rows.

ONION SEED

I grow thousands of pounds of Onion Seeds. You will find these of excellent quality.

Burrell's Private Stock, Colorado Bronze Globe Onions

This is a special selection from the Southport Yellow Globe. It is a great yielder and one of the best to store for spring trade, as it is an excellent keeper. The bulbs are a bronze color, shaped as shown in cut, of good size.

The yield of the field from which my stock to grow this seed was selected produced 900 bushels per acre. I have grown an excellent crop and offer at direct-from-the-grower prices—10c per pkt.; 20c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 per lb. in 10-lb. lots and up. Postage or express paid.

Large Red Wethersfield

It is fine-grained and strong in flavor. Very productive and an excellent keeper. Immense crops of this are grown for shipment, and it certainly is one of the very best sorts for market. Price—10c per pkt.; 20c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 per lb. in 10-lb. lots and up. Postage or express paid.

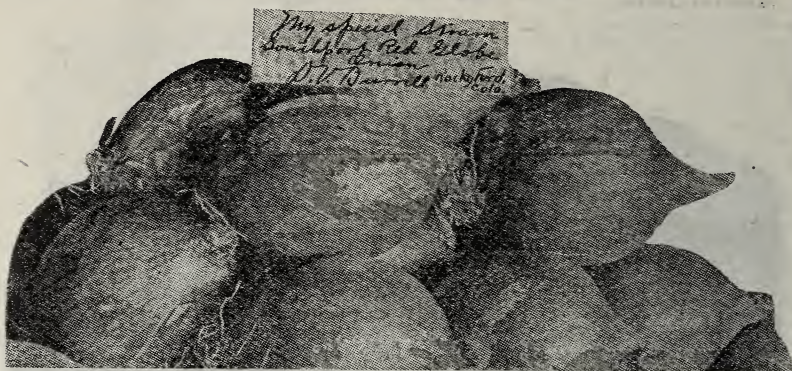

Australian Brown Onion

A valuable, early variety of medium size, hard and solid, attractive for market, both as to form and appearance. Never make any stiff necks or scullions. It has the reputation of keeping indefinitely. Color of the skin is a clear amber brown. Price—10c per pkt.; 20c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 per lb. in 10-lb. lots and up. Postage or express paid.

White Portugal or Silver Skin VERY SHORT CROP

A large, flat, white onion of mild and pleasant flavor; hard and fine-grained and a good keeper. More extensively sown for sets than any other variety and is also largely grown for pickling. Price—10c per pkt.; 30c per oz.; 80c per $\frac{1}{4}$ lb.; \$3.00 per lb.; \$2.75 per lb. in 10-lb. lots and up. Postage or express paid.

ONIONS

Burrell's Special Stock, Southport Red Globe Onion

The above is a photograph of some of my onions. The type is right and the quality of the best to be had. It matures nearly as early as the flat sorts, grows to a large size and is very mild and tender. It is a GOOD KEEPER and considered ONE OF THE BEST RED ONIONS. Price—10c per pkt.; 20c per oz.; 60c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots and up. Postage or express paid.

Southport Yellow Globe

Shape same as Colorado Bronze Globe. (See previous page.) This variety is well known and planted very extensively in the East. It is a little later than the Globe Danvers, a very heavy yielder and a sure cropper. Price—10c per pkt.; 20c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 per lb. in 10-lb. lots and up. Postage or express paid.

Southport White Globe

Same shape as above; color a clear white. The best keeper of the white sorts. Produces a heavy crop of excellent quality and always sells for top prices on the markets. Price—10c per pkt.; 25c per oz.; 80c per $\frac{1}{4}$ lb.; \$3.00 per lb.; \$2.80 per lb. in 10-lb. lots and up. Postage or express paid.

Ohio Yellow Globe

The bulbs are large and uniformly globe shaped. Color a deep yellow, flesh white and of excellent quality. The crop ripens evenly and the yield under favorable conditions is extremely heavy. Price—10c per pkt.; 20c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 per lb. in 10-lb. lots and up. Prepaid.

Onion Sets

These are grown from seed planted very thickly. I plant at the rate of 85 pounds of seed per acre. This produces small sets, which are of excellent quality. They produce early onions and are easily tended. Set about three inches apart in rows as early as you can in the spring and then for succession every three or four weeks until July. A pound is a quart.

RED BOTTOM SETS AND YELLOW BOTTOM SETS, 20c per lb., postpaid. Not prepaid, 10c per lb.; 8c per lb. in 100-lb. lots and up.

WHITE BOTTOM SETS, 25c per lb., postpaid. Not prepaid, 15c per lb.; 12 $\frac{1}{2}$ c per lb. in 100-lb. lots and up.

Write for prices on large lots. Above prices subject to sale and changes in market conditions.

ONIONS

Yellow Globe Danver Onion

Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks; globular in shape, has a small top. It is the most productive, producing as high as 1,000 bushels per acre, and will average on good soil with proper culture, 600 to 700 bushels. It is a splendid keeper, well rounded, a very small amount of waste. This seed has proven a great favorite with my customers, who plant thousands of pounds. Price—10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 per lb. in 10-lb. lots and up. Postage or express paid.

Burrell's Mountain Danvers

This onion is between the flat and the globe shape. I grow it in the mountains where the altitude is nearly a mile high and in sight of hundreds of snow-covered peaks. It is very productive, an excellent keeper. I want all my customer to plant of it. My crop this year amounts to several thousand pounds. Price—10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.60 in 10-lb. lots; \$1.50 per lb. in 100-lb. lots.

Onion Seeds for Growing Sets

Large quantities of seeds are used for growing sets. If you have not grown sets will say you will need 80 to 90 lbs. of seed per acre. The yield usually amounts to 500 to 600 bushels per acre. I offer seeds for this purpose at lowest possible prices. Write for prices, stating quantity you wish. Varieties recommended: Red Wethersfield, Yellow Flat Danvers, Yellow Strasburg and White Portugal.

ONIONS

Ailsa Craig Onion

This very large, nearly round, straw-colored onion is one of the largest grown. It is in great demand in the markets wherever offered.

By planting the seed very early in frames and transplanting to the open ground as soon as the ground will do to work in the spring, at which time the plants should be the size of a large lead pencil, very large crops can be produced.

This onion is very mild and any district where onions grow well can establish a paying industry by growing these and marketing them crated.

A very fine exhibition onion. Grow some of these in your garden, either for market or home use, and you will be well pleased. Price—5c and 10c per pkt.; 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.10 per lb.; \$4.00 per lb. in 10-lb. lots and up, postpaid.

Denia

One of the very large Spanish types. Very mild flavor. Color light straw, nearly white; shape nearly globe, slightly less than Ailsa Craig. Plant for home garden or local trade where heaviest possible yield is wanted. Price—5c and 10c per pkt.; 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.10 per lb.; \$4.00 per lb. in 10-lb. lots and up.

Prizetaker

Shape and color like the Ailsa Craig, being nearly a perfect globe. Hundreds of acres of this sort are grown in single districts of Texas. This variety of recent introduction annually grows in favor. It is very productive, attractive in appearance and quality, being mild in flavor as the imported Spanish onions of our grocers, can be grown successfully in any locality where other onions are produced. The color is a bright straw, and it always grows to a uniform shape. Having a small neck, stiff necks are almost unknown. We call attention to the fact: Our seed is the choicest American grown and not imported Spanish King, as sold by some dealers at low prices under the name of Prizetaker. Price—5c and 10c per pkt.; 20c per oz.; 75c per $\frac{1}{4}$ lb.; \$2.75 per lb.; 10 lbs. and up, \$2.60 per lb., postpaid.

Giant White Italian Tripoli

El Paso or Large Mexican. Of large size and most beautiful form with fine white skin. The first season it will grow an onion from one to one and a half pounds. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up, postpaid.

PUMPKINS

Small Sugar or New England Pie

An excellent sort; shape as shown above. Flesh very deep orange. Fruits 8 to 10 inches through. The quality is of the best; none better for pies. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Postage or express paid.

LARGE SWEET CHEESE

Flat, creamy yellow, well known; one of the standard sorts. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb.; 75c per lb. in 10-lb. lots and up. Postage or express paid.

CONNECTICUT FIELD

The well-known, large, yellow field pumpkin. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 60c per lb. in 10-lb. lots and up. Postage or express paid.

KING OF MAMMOTHS

This is the exhibition pumpkin for the fair, often weighing 150 to 200 pounds. In quality none are better for pies, and except where the black squash bug is bad it always yields heavily. Outer color light creamy red; meat deep orange red. Note.—Often the seed from a big specimen is sold at 5c per seed to those who do not know it by name. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots and up. Postage or express paid.

JAPANESE PIE

Dark slate-colored, with slightly lighter green mottled stripes. Neck large. Meat deep orange red, quality excellent. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots, prepaid.

GREEN-STRIPED CUSHAW

Light green, with darker green stripes. Large, solid neck; flesh light yellow. Well known and equally well liked. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots, prepaid.

LIVINGSTON'S PIE

Shaped like small sugar, netted; flesh deep orange, fine-grained, quality excellent. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots, prepaid.

Parsley

CHAMPION MOSS CURLED

Leaves finely curled, deep, rich green color; slow to run to seed. Excellent quality. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots, prepaid.

FINE DOUBLE CURLED

A standard variety; very ornamental; yields abundantly. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots and up, prepaid.

PEAS

Alaska

The very best early green-seeded variety. The dark green color of the pods make it an excellent pea for shipping long distances. Very early and uniform grower. A popular sort with canners and shippers. First-class in every respect. Height, 2½ feet

Price—10c per pkt., 25c per lb., prepaid.

Not prepaid—15c per lb.; 14c per lb. in 10-lb. lots; 13½c per lb. in 100-lb. lots.

AMERICAN WONDER. One of the earliest wrinkled peas of very good quality; grows about 10 inches high and is very productive.

Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—20c per lb.; 18c per lb. in 10-lb. lots; 17c per lb. in 100-lb. lots.

McLEAN'S LITTLE GEM. One foot high; bears heavily and of excellent quality; slightly later than the American Wonder. A favorite sort.

Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—20c per lb.; 18c per lb. in 10-lb. lots; 17c per lb. in 100-lb. lots.

NOTT'S EXCELSIOR. This extra fine pea will stand planting very early, almost as soon as the smooth sorts, and produces fine, large pods, one-third larger than American Wonder. Dwarf in habit; height 1 foot.

Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—20c per lb.; 18c per lb. in 10-lb. lots; 17c per lb. in 100-lb. lots.

Stratagem

This is a long-podded, dark-colored sort of very fine quality, which is much in demand with market growers.

The vines grow vigorously, about 18 inches high, and bear abundant crops of these large pods, containing 9 to 11 large wrinkled peas. They are very large and uniform. My stock is of the best produced in the country.

Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—25c per lb.; 23c per lb. in 10-lb. lots; 22c per lb. in 100-lb. lots.

Pride of the Market

Vines of medium height, stiff, with large, dark green leaves and bearing at the top, generally in pairs, a good crop of large, pointed dark green pods well filled with large peas of good flavor. I have given this variety special attention and the stock I offer is so much superior to that commonly sold as to seem a different sort. I recommend it as one of the very best of the large-podded varieties, especially suitable for market gardeners.

Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—25c per lb.; 23c per lb. in 10-lb. lots; 22c per lb. in 100-lb. lots.

PEAS—Continued

Dwarf Telephone or Daisy

I market-gardened a number of years and if I were offered only two varieties of peas I would choose Alaska for early and Dwarf Telephone for main crops. It is a cross between the Standard Telephone and Strata-gem, and is an improvement on both of these varieties. It grows 18 inches high and yields an abundance of long, well-filled pods, containing from 7 to 11 large wrinkled peas of the finest quality.

A vigorous growth is characteristic of this sort. For the market or home garden there is none better. Every planter should have some of this. Price—10c per pkt.; 50c per lb., prepaid.

Not prepaid—40c per lb.; 38c per lb. in 10-lb. lots; 35c per lb. in 100-lb. lots.

Telephone

The Telephone has become one of the leading peas with market gardeners whose trade appreciates fine appearance and high quality. Vines vigorous, growing about 4 feet high, with large, coarse, light-colored leaves and producing an abundance of very large pointed pods filled with very large peas which are tender, sweet and of excellent flavor. It comes into use soon after the Premium Gem and is one of the best sorts for either home or market. Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—25c per lb.; 23c per lb. in 10-lb. lots; 20c per lb. in 100-lb. lots.

Alderman

The Alderman is of the Telephone type, and for early, main crop it is one of the best. The vines are about four feet high and very productive, the pods four to five inches long and an attractive dark green. The peas are very large and of excellent quality. The Alderman is the pea that meets the market gardener's demand for above qualities. Price—10c per pkt.; 35c per lb., prepaid.

Not prepaid—25c per lb.; 23c per lb. in 10-lb. lots; 20c per lb. in 100-lb. lots.

PARSNIPS

Prepare a seed bed as for beets. Drill in rows 18 inches apart, covering the seeds one-half inch deep. The seeds germinate slowly, and a few lettuce seed mixed with the parsnip will come up quickly and mark the row so you can cultivate the parsnip before it comes up, if desired.

Plant the seed very early, as soon as the soil will do to work. Give frequent cultivation and thin to 4 inches apart in the row.

Parsnips are of great value both for the table and for feeding stock. They yield an abundant crop.

Plant 4 pounds of seed per acre; $\frac{1}{4}$ oz. to 100 feet of drill.

Hollow Crown or Large Sugar Parsnip

This is a very desirable sort; productive, large, smooth white skin, uniform in shape, tender and of best quality. The roots average twelve to fourteen inches long in loose deeply plowed soil. This vegetable should be grown in every garden. Grow enough to serve on your table from after the first freeze in the fall until late spring. Part of the crop may be left in the ground over winter. Put enough in your cellar to last until the frost is out in the spring.

Price—Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 60c; 10 lbs. and up, 50c per lb., delivered free.

Peppers

Give peppers the same cultural methods as egg plants. (See egg plant.)

Select Ruby Giant

My seed of this variety is extra fine. Many who planted it for market report having grown the finest and most profitable crop they ever grew. I sell large quantities of this seed to individual growers and associations.

The fruits are very large, often measuring 5 inches in length and 3 to 3 $\frac{1}{2}$ inches in diameter. AN EXCELLENT MANGO PEPPER.

The best and most profitable mild red pepper for market or family use; so sweet and mild that they can be eaten raw, like an apple; largest size: Price—5c and 10c per pkt.; 50c per oz.; \$1.75 per $\frac{1}{4}$ lb.; \$6.50 per lb.; \$6.25 per lb. in 5-lb. lots and up, prepaid.

Ruby King

This is a well-known and excellent variety, shaped as shown in cut. Green when suitable for mangoes, very mild and a profitable sort to grow. Price—5c and 10c per pkt.; 50c per oz.; \$1.75 per $\frac{1}{4}$ lb.; \$6.50 per lb.; \$6.25 per lb. in 5-lb. lots and up. Prepaid.

PEPPERS—Continued

Chinese Giant Pepper

A very large variety of extra fine quality. Not so long as Ruby King, but thicker, and one of the best mango peppers. Well known and well liked by market growers. Price—5c and 10c per pkt.; 60c per oz.; \$2.00 per ¼ lb.; \$7.00 per lb.; \$6.90 per lb. in 5-lb. lots and up. Postage or express paid.

LONG RED CAYENNE. A small, long, bright red sort, very productive, extremely strong and pungent. Price—5c per pkt.; 30c per oz.; 90c per ¼ lb.; \$3.50 per lb. Postage or express paid.

LARGE BELL OR BULL NOSE. A favorite and well-known pickling sort; is early, large, mild and thick-skinned. Price—5c per pkt.; 35c per oz.; \$1.00 per ¼ lb.; \$4.00 per lb. Postage or express paid.

MAMMOTH GOLDEN QUEEN. One of the largest, handsomest and must productive of all varieties; color bright golden yellow; large as Ruby King; flavor mild and pleasing. Price—5c per pkt.; 45c per oz.; \$1.50 per ¼ lb.; \$5.50 per lb. Postage or express paid.

SWEET SPANISH. Grows to very large size; sweet flavor, fine for salad. Price—5c per pkt.; 45c per oz.; \$1.50 per ¼ lb.; \$5.50 per lb. Postage or express paid.

MEXICAN CHILI. Used by the Mexicans in making the famous chili con carne and hot tamales. Grows from 3 to 5 inches long and quite pointed. Requires a long, warm season. Plants should be started quite early in hot beds. I offer my customers the following low prices on this seed: 5c per pkt.; 35c per oz.; \$1.00 per ¼ lb.; \$4.00 per lb. Postage or express paid.

RED CHERRY. Plants tall, bearing a profusion of bright red, round fruit, which is very pungent when ripe. The plant is very handsome and an ornament to the garden. Price—5c per pkt.; 30c per oz.; 90c per ¼ lb.; \$3.25 per lb. Postage or express paid.

RHUBARB

Rhubarb is one of the most valuable early garden products, and every one of my customers should grow some of it. Rhubarb pies, rhubarb sauce and rhubarb jelly are very fine. The leaf stalk is used. It is the earliest spring vegetable.

Culture.—Rhubarb seed may be drilled in rows 2 feet apart, covering the seed 1 inch deep. Thin the plants to 6 inches apart in the rows.

When one year old transplant either in the fall or spring to the permanent bed which has been previously prepared by manuring heavily and plowing deep, setting the plants 4 feet apart in rows 6 feet apart. Give a heavy coat of manure each spring. Cultivate well and ridge slightly. Do not gather any of the rhubarb from the permanent bed until the second year and do not pull off more than half the stalks at any one time, as this weakens the plants.

When seed stalks appear, break them off, as if the plants run to seed they become exhausted and produce small stalks.

Rhubarb seed does not reproduce true, and while good results obtain from seed, the best plan is to set out clumps containing two and three eyes each, cut from old crowns which have produced the class of stalks desired.

Rhubarb Linnaeus

This variety well grown produces stalks 18 to 24 inches long when matured. Suitable to use after 5 or 6 inches long. The stalks are tender and of excellent quality. Color a bright crimson slightly tinged with green.

Price—10c per pkt.; 15c per oz.; 45c per ¼ lb.; \$1.50 per lb.; \$1.40 per lb. in 10-lb. lots and up. Prepaid.

RADISHES

For forcing under glass or in hot beds use a rich sandy soil. Scatter the seeds evenly over the surface, 40 to 50 to the square foot and sift soil over the seeds, covering about 1 inch deep. Keep the soil moist and of even temperature, at about 70 degrees, for best results. Give good ventilation.

Under these conditions you should be able to market the whole crop in four to five weeks.

For outdoor culture sow in drills 14 to 18 inches apart as soon as the soil can be worked in the spring. Sow some of the small sorts, and at the same time some of the long. I prefer Cinninati Market and White Icicle. These are ready soon after the small sorts and do not get pithy so soon.

The soil should be very rich, and if under irrigation, water regularly to keep the plants continuously growing, but do not water too heavily.

I am very careful to have the best seed produced, and where better results are had by so doing I offer seed from transplanted roots. This applies particularly to my Cinninati Market. Many who buy large lots of this seed state they have not been able to secure its equal elsewhere. Ten to 12 pounds of seed per acre, 1 oz. to 150 feet of drill.

CRIMSON GIANT. This valuable early sort is one of the finest for extra early; color very deep scarlet; very solid, slow to get pithy and very desirable for the home garden or early home market. Excellent to grow under glass. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots, prepaid.

EARLY SCARLET TURNIP. A fine, quick-growing sort; small, round, crisp, tender, of good eating qualities. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 75c per lb. in 10-lb. lots, prepaid.

ROSY GEM OR WHITE-TIPPED FORCING. One of the quickest sorts and of excellent quality. Bright scarlet with white tips; of fine appearance. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 75c per lb. in 10-lb. lots, prepaid.

EARLY WHITE TURNIP. Of quick growth, roots round, white, with small tops. Good for forcing or open ground. Flavor very good. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 75c per lb. in 10-lb. lots, prepaid.

FRENCH BREAKFAST. (Olive shaped.) Deep crimson with white tips. A well-known and equally well-liked variety. One of the best early radishes. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 75c per lb. in 10-lb. lots, prepaid.

EARLY SCARLET. (Olive shaped.) Oval, very tender and good quality; fine for forcing or open ground. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb.; 75c per lb. in 10-lb. lots, prepaid.

VICK'S SCARLET GLOBE. Bright scarlet, nearly round, very early, mild, crisp and fine grained; fine for home garden or for forcing. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb.; 75c per lb. in 10-lb. lots and up, prepaid.

EARLY WHITE. (Olive shaped.) Small, sweet and crisp. Like the other olive-shaped sorts except in color. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots.

All Radish Seed delivered free by parcel post or express.

RADISHES—Continued

Burrell's Long Cincinnati Market

Special Market Gardener's Strain

Single Market. Gardeners buy 50 to 100 pounds of this seed from me at a time. The finest Long, Light Scarlet Radish, nearly transparent; small tops, will stand planting close together, slow to run to seed; grows straight and smooth, 6 to 8 in. long, tender, crisp and does not become hollow and pithy. If you grow for market and plant only two sorts they should be my Long Cincinnati Market and New White Icicle. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 75c per lb. in 10-lb. lots and up. Prepaid.

Long Chartier

A well-liked sort, which attains a very large size before becoming unfit for use. Color, red at the top, changing to pink in the middle and white at the tip. Many market gardeners plant this exclusively for their market trade. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 75c per lb. in 10-lb. lots. Prepaid.

Long Scarlet Short Top

The standard long variety. Well known for a long time. Good for home or market garden. Roots long, growing partly above the ground, straight, smooth, rich red and of fine quality; a quick grower. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 75c per lb. in 10-lb. lots. Prepaid.

Long Brightest Scarlet

This new sort much resembles Long Scarlet in shape, but is slightly shorter. It is a very bright scarlet with a white tip and very attractive in appearance. The quality is extra good and it matures quickly. It is a good seller and fine for home gardens as well. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 75c per lb. in 10-lb. lots. Prepaid.

Long Black Spanish

Black-skinned, large roots, slightly pungent, hardy. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 75c per lb. in 10-lb. lots.

All Radish Seeds delivered free by parcel post or express.

Be sure to order some of the Giant Japanese Radishes listed on page 52—these are very fine.

RADISHES—Continued

New White Icicle Radish, Burrell's Select Seed

This beautiful transparent white variety much resembles the White Vienna. It is of excellent quality. Under favorable conditions stands a long time without going to seed and remains crisp and tender.

It is a sort which should be included in every order; suitable for forcing, and none better for the home or market garden. Price—5c per pkt.; 10c per oz.; 30c per 1/4 lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots.

WHITE VIENNA OR LADY FINGER

Remaining long in edible condition; always sweet, crisp and tender, and of excellent quality. I hope to find this sort in every order, and I know you will be pleased.

Price—5c per pkt.; 10c per oz.; 25c per 1/4 lb.; 85c per lb.; 75c per lb. in 10-lb. lots.

WHITE STRASBURG

A large, white, attractive variety of medium length; matures early and remains for a long time in edible condition.

Price—5c per pkt.; 10c per oz.; 25c per 1/4 lb.; 85c per lb.; 75c per lb. in 10-lb. lots.

All Radish Seed delivered free by parcel post or express.

GIANT JAPANESE RADISHES

Seed of the following varieties should be planted about May 1st in the middle and northern states. Prepare a deep seed bed and plant same as other radishes, but thin to 8 or 10 inches apart. Cultivate frequently and water if convenient. These radishes often grow to weigh 10 to 15 pounds and are of excellent quality either served as ordinary radishes or cooked. In Japan they take the place of potatoes. Wonderful yielders.

SAKURASHIMA MAMMOTH RADISH. This variety has been grown of immense size; is a transparent white, never pithy. Can be stored in sand or pit and used during the winter. Excellent either as other radishes are eaten without cooking or very good cooked. After growing these in my own garden I believe they should be in every garden. This variety has been grown to weigh 30 pounds. Price—10c per pkt.; 20c per oz.; 60c per 1/4 lb.; \$2.00 per lb. Prepaid.

NERIMA LONG RADISH. Think of a radish two to three inches in diameter, fifteen to eighteen inches long. Beautifully transparent white and of excellent quality. This is what you will grow under good conditions from my seed of the Nerima Long. Grow these two fine Japanese Radishes for exhibition and they will attract a great deal of interest. The best part of it is their excellent quality. Price—10c per pkt.; 20c per oz.; 60c per 1/4 lb.; \$2.00 per lb. Prepaid.

Be sure to plant some of the Giant Japanese Radishes listed above.

OKRA

Extra Early Dwarf (Green Pods). Very early and productive. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postpaid.

Early Dwarf White (White Pods). Pods extra long and when fully matured, measuring a foot in length and very thick and fleshy; early and prolific. Fine for soups. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postage or express paid.

White Velvet. A great improvement over older varieties; pods larger, white, very smooth, a more abundant bearer; superior quality. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postage or express paid.

Perkins' Perfection Mammoth Green Pod. This seed is grown for me by Mr. Perkins, who originated it. He has given the crops great care, and the stock is of the best to be had. The most productive. Pods very large. Extremely early, tender and preferred by canners as well as growers for market. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postage or express paid.

Salsify (Vegetable Oysters)

Many prefer salsify to oysters. The soup from which gives off an odor exactly the same as oysters, and by some liked better than oyster soup. Every garden should produce some of this easily grown plant. Plant very early in the spring. Prepare the soil as for beets; drill in rows 14 to 18 inches apart, so the plants stand 2 to 3 inches apart. The roots grow more nearly straight when close together.

Salsify, Mammoth Sandwich Island—5c per pkt.; 20c per oz.; 75c per ¼ lb.; \$2.75 per lb. Postpaid.

Spinach

Bloomsdale (Savoy-Leaved). Large, thick, curled leaves. Price—5c per pkt.; 10c per oz.; 20c per ¼ lb.; 70c per lb., postpaid; 60c per lb., not prepaid.

Round-Leaved Viroflay. Large, thick-leaved, good. Price—5c per pkt.; 10c per oz.; 20c per ¼ lb.; 70c per lb., prepaid; 60c per lb., not prepaid.

Prickley or Winter. Usually planted in the fall; plants grow very large. Price—5c per pkt.; 10c per oz.; 20c per ¼ lb.; 70c per lb., postpaid; not prepaid, 60c per lb.

Swiss Chard. This is really of the beet family. Mid-leaf very broad; cooked like asparagus. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 80c per lb., postpaid.

Squash

The cultural methods for melons and cucumbers will apply. Plant summer sorts 3 to 4 feet each way and thin to one plant when they have five or six leaves. Winter sorts 6 to 8 feet each way and thin to one plant. Make the soil rich. Handle very carefully when harvesting, so as not to bruise them and injure the keeping qualities. Cut from the vine, leaving the stem on the squash; store where there is no danger from freezing. For insects, see pumpkins. Plant 3 pounds of seed per acre.

Early Mammoth Yellow Crookneck.

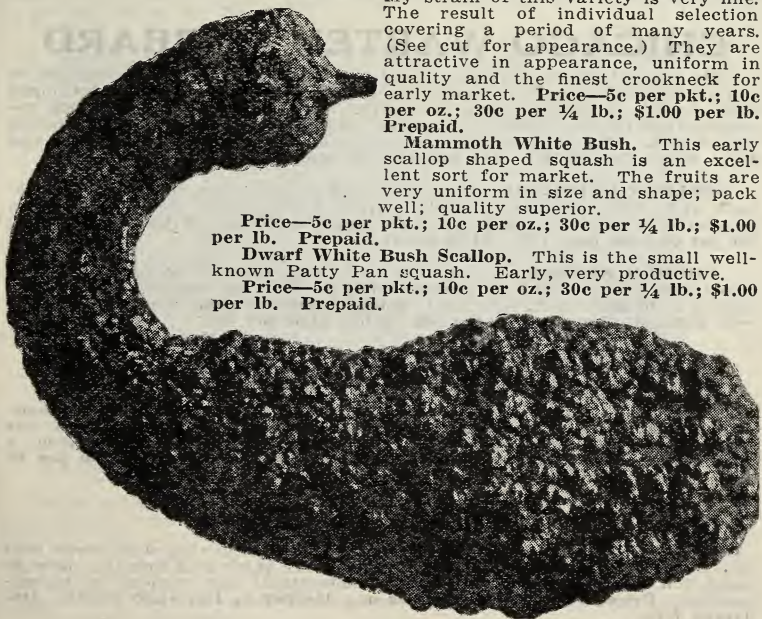

My strain of this variety is very fine. The result of individual selection covering a period of many years. (See cut for appearance.) They are attractive in appearance, uniform in quality and the finest crookneck for early market. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb. Prepaid.

Mammoth White Bush. This early scallop shaped squash is an excellent sort for market. The fruits are very uniform in size and shape; pack well; quality superior.

Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb. Prepaid.

Dwarf White Bush Scallop. This is the small well-known Patty Pan squash. Early, very productive.

Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb. Prepaid.

SQUASH—Continued

IMPROVED HUBBARD

This is the standard variety and has no superior. If you are planting but one variety for winter I would recommend that this be the Hubbard. It is a favorite both for market and home use. Good specimens are about equal to the sweet potato. The shell is hard and dry, and with some care can be kept until late in the spring. My strain is very fine. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.

CHICAGO WARTED HUBBARD

My crop of this variety grown for 1921 was grown in the mountains at a high altitude where the conditions are such that hardness is developed even more than where grown far north. This very fine variety much resembles the Original Hubbard, except that it is larger and more covered with warts. Can be kept until late spring. The shell is very hard and dry. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.

GOLDEN HUBBARD. This is slightly smaller than the Original Hubbard and instead of having a slate green rind, it is a rich golden color. In quality it is unsurpassed. It is an excellent keeper. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.

GOLDEN BRONZE. A very fine sort; flesh thick, deep reddish orange color; fine grained and of excellent flavor. A good keeper; shape oval, largest at blossom end; the rind is golden bronze in color when ripe. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.

PIKE'S PEAK

This excellent sort is a favorite with all who have grown it. Shape rather long for its thickness; larger at the stem end, tapering toward the blossom end. Slate colored rind; flesh creamy yellow, of good flavor; a good keeper. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.

DELICIOUS

This fall variety of medium size is of excellent quality and keeps well into the winter. The flesh is fine grained, very thick and bright yellow in color. Where quality is of first consideration this variety is recommended. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb. Delivered free.

Two Finest Varieties of Tomatoes

Burrell's Special Selection of Chalks Early Jewell and Burrell's Special Selection of John Baer

These two varieties are the highest development of tomatoes yet introduced when you consider both extreme earliness, smoothness, heavy bearing, desirable size and quality and suitability for market.

BURRELL'S SPECIAL SELECTION OF CHALKS EARLY JEWELL is grown from the finest possible selection of stock seed. I have year after year selected the seed from the very finest plants for separate planting and from the best grown in this way I have grown these seed crops. Fruits large, smooth, deep red and the yield is much above ordinary sorts in tons per acre; very early.

You will be pleased with this seed. The price only pays me about what you get for early tomatoes on the market at 5c per pound. **Price of Seed—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$7.00 per $\frac{1}{2}$ lb.; \$13.50 per lb. Postpaid.**

BURRELL'S SPECIAL SELECTION OF JOHN BAER. As soon as the John Baer tomato was introduced I secured some of the introducer's best stock and have carefully selected from the finest plants to have to offer you very fine seed. This, like the Early Jewell above, is a deep red, smooth tomato, which yields a heavy crop, begins ripening very early and the home garden or the Market Garden can grow no better sort. **Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$7.00 per $\frac{1}{2}$ lb.; \$13.50 per lb. Postpaid.**

Tomatoes—Continued

SPARK'S EARLIANA TOMATO, BURRELL'S SPECIAL STRAIN. This Extra Early red tomato is the source of large returns to market gardeners and for home gardens, especially in the north, where the season is short, they are very valuable to grow. The fruits are borne in clusters, the vines are small and can be set as close as $3\frac{1}{2}$ feet apart each way. The crop yield is heavy and for so early a variety the fruits are very smooth.

Customers report ripe tomatoes two weeks ahead of their neighbors.

My stock is selected carefully year after year from the finest and will surely please you.

Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$7.00 per $\frac{1}{2}$ lb. Not over $\frac{1}{2}$ pound to a customer.

BONNY BEST TOMATO. This extra early smooth red tomato has proven a very good sort and many report very good results from it. The same care is exercised in the production of this seed as in my other stocks, except that this seed is not line bred as are my special stocks of Early Jewell, John Baer and Earliana.

Price—5c per pkt.; 15c per $\frac{1}{4}$ oz.; 50c per oz.; \$1.85 per $\frac{1}{4}$ lb.; \$3.50 per $\frac{1}{2}$ lb.; \$6.50 per lb. Postpaid.

MARKET GARDENERS' STRAIN BEAUTY TOMATO

is now far ahead of the seed of this variety usually offered. On the market 8-pound baskets of these sold readily at 50c per basket, when 20-pound baskets of ordinary tomatoes were selling at 75c per basket, nearly double the price of ordinary tomatoes. It pays to plant only the best.

This strain is not offered through any other source. Those who secure a supply will be fortunate.

Remember, an ounce of seed produced 2,500 to 3,000 plants, and at the price per ounce, the cost compared with the crop is practically nothing.

No better sort for home garden or shipping; hardy, strong grower, productive; fruits large, smooth and of excellent quality. Color a glossy crimson tinged with purple. Grows in clusters of four to six large fruits and retains its large size late in the season. The flesh is firm, skin tough, and it seldom rots or cracks after it rains. They can be picked as soon as there is a slight change in color from green, and ripen up nicely, look well and keep a long time after ripe.

Price—10c per pkt.; 50c per $\frac{1}{2}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$14.00 per lb., postpaid.

Tomatoes—Continued

The New Hummer Tomato

THIS VALUABLE VARIETY was introduced in 1907 and sold by the originator at $\frac{1}{2}$ c per seed (20c per packet of 40 seeds). I secured a supply of this seed from him and grew my supply of seed here under irrigation, where there is no better place to mature the best seed. From this start I selected the seed offered here. It was one of the best crops of tomatoes I have ever grown. A representative of the Kansas City Packer visited the field and stated that he "BELIEVES it the finest sort in cultivation."

The fruits are round, with practically no indentation at the stem, color bright red. Fruit solid, with but few seeds set near the rind. No green core; the fruits ripen all over and clear through. The center cuts solid, bright, red flesh of extra quality. Almost an extra early sort.

Price—10c per pkt.; 75c per oz.; \$2.75 per $\frac{1}{4}$ lb.; \$10.00 per lb., postpaid.

Livingston's Globe Tomato

This is one of the finest market sorts. The fruits are large, and a good marketable size is retained throughout the season; always smooth, firm-fleshed and with few seeds; ripens evenly; color, a fine glossy rose, tinged with purple, and without the slightest hint of yellow at any stage of ripening. Fruit clusters spring from the main stem much closer together than in most sorts. It is a remarkably good keeper, none of the many varieties we grow surpassing it in this respect. In quality there is nothing more to be desired, being mild, pleasant and of delicate flavor, and the beautiful and attractive globe-shaped fruits will find ready sale. I sell large quantities of this seed to Southern growers.

One large Florida grower wrote me that my Globe tomato seed gave better results than any other Globe tomato seed they could get and wanted more "just like we got last year."

Price—10c per pkt.; 40c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$5.50 per lb.; 10 lbs., \$5.00 per lb., postpaid.

Standard Tomato Seeds

This grade of seed is grown very extensively. Only the best stock seeds are planted and large acreages of each variety, well separated from other varieties, are grown for seed. The crop is harvested and the seed separated by machines and the pulp used for catsup. This is very good seed and by saving the by-products the seed can be offered for a much lower price.

EARLY DETROIT

This excellent variety is the largest of the early purplish pink tomatoes; shape nearly globe; quality of the best. The fruits resemble Livingston's Globe and this is about equal to the Globe as a shipper; recommended for either home or market garden.

Price—10c per pkt.; 35c per oz.; \$1.00 per ¼ lb.; \$3.75 per lb.; \$3.50 per lb. in 5-lb. lots and up.

	Pkt.	Oz.	¼ lb.	Lb.	5-lb. lots
Standard Chalk's Early Jewell.....	5c	35c	\$1.00	\$3.75	\$3.50
Standard Spark's Earliana	5c	35c	1.00	3.75	3.50
Standard Livingston's Beauty	5c	35c	1.00	3.75	3.50

The following prices include free delivery by parcel post or express:

JUNE PINK. This sort is among the extra earlies and the fruits are of good quality. It is grown very extensively in many fruit sections, where first in the market means so much. The fruits are medium size, pink, and of good quality. Price—5c per pkt.; 30c per oz.; \$1.00 per ¼ lb.; \$3.50 per lb.; \$3.25 per lb. in 5-lb. lots and up.

LIVINGSTON'S EARLY ACME. A tomato especially for early market use. Well known and generally cultivated, both for early and main crops. Plants are of strong and vigorous growth; very productive; fruits of medium size, perfect form, round, slightly depressed at the ends and very smooth (never rough); color a glossy red, with purplish tinge; ripens all over and through at the same time. Price—5c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

DWARF STONE. This large bright red tomato is borne on small stalky plants which stand erect. Early to medium late. Quality very good. An excellent shipper; ripens evenly. Price—5c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

DWARF CHAMPION. Most distinct and valuable. Dwarf, stiff habit, dark green foliage, not needing any support. It is very early and wonderfully prolific. Color same as Acme. It is perfectly round and smooth, of medium size. Price—5c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

NEW STONE. Is a well-known variety, which ripens for main crop; very large and of bright scarlet color; very smooth, with occasionally a specimen slightly octagonal shape; ripening evenly to the stem, and as the name indicates, it is very solid and an excellent shipper. Price—5c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

MATCHLESS. This new late variety is one of the best, handsomest and heaviest yielders known. The tomatoes are large, bright red and ripen very evenly, yielding few seeds. They are an excellent shipping variety and also good for canning. Price—5c per pkt.; 35c per oz.; \$1.25 per ¼ lb.; \$4.50 per lb.; \$4.25 per lb. in 5-lb. lots and up.

MAGNUS. A distinct and new variety; purple, robust in habit and a good main crop sort. Price—5c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

LIVINGSTON'S PERFECTION. The fruit is almost round, ripens clear up to the stem, is solid and rich in flavor. The skin is both thin and tough, making it a good shipper, while its clear, scarlet color makes it most attractive. Price—5c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

PONDEROSA. This is the largest fruited tomato and of fine quality for slicing. The vines are of strong, rather open growth; fruits largely oblong in form, deep through and generally ridged or ribbed; deep purple in color. The flesh is solid, with small seed cells, and of fine, sweet flavor. Planted in good soil, fruits frequently attain a weight of 1 pound and over. Rather late to ripen. Price—5c per pkt.; 35c per oz.; \$1.25 per ¼ lb.; \$4.50 per lb.; \$4.25 per lb. in 5-lb. lots and up.

WHITE'S EXCELSIOR. A large pink main crop sort of considerable value. In some sections it is a favorite sort. While not an early sort, it is an excellent shipper. Price—5c per pkt.; 20c per oz.; 60c per ¼ lb.; \$2.00 per lb.; \$1.75 per lb. in 5-lb. lots and up.

YELLOW PLUM. Fruit plum-shaped, deep yellow color; flesh yellow and good; esteemed for preserves. Price—5c per pkt.; 30c per oz.; 90c per ¼ lb.; \$3.50 per lb.; \$3.25 per lb. in 5-lb. lots and up.

Above prices parcel post or express paid.

TURNIP

White Egg

largely for sowing broadcast among corn and potatoes. It is round and flat, white on the bottom and a reddish purple above the ground, and a very quick grower. It is a fine variety, either for the table or for stock feeding. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb.; 65c per lb. in 10-lb. lots.

EARLY WHITE FLAT DUTCH. An excellent garden variety; the best for spring sowing. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb.; 65c per lb. in 10-lb. lots.

EXTRA EARLY PURPLE TOP MILAN. This is the earliest turnip in cultivation and a splendid variety; bulb white and flat, of medium size with a bright purple top; one of the sweetest and finest flavored of summer sorts. Price—5c per pkt.; 20c per oz.; 35c per $\frac{1}{4}$ lb.; \$1.30 per lb.; \$1.20 per lb. in 10-lb. lots.

EARLY WHITE MILAN. One of the earliest turnips, possessing all of the good qualities of the Early Purple Top Milan. It is very smooth and entirely white. Its excellent qualities and fine appearance make it a valuable crop to grow, and it is ready for market a week earlier than any other white variety; will produce a heavy crop. It will be one of the best for market. Price—5c per pkt.; 10c per oz.; 35c per $\frac{1}{4}$ lb.; \$1.30 per lb.; \$1.20 per lb. in 10-lb. lots.

PURPLE TOP WHITE GLOBE

This excellent table variety is globular in shape, of good size and very attractive appearance. The roots are large, purple or dark red above ground, white below. The flesh is white, fine grained and tender. The roots when in best condition for the table are about 3 inches in diameter, but can be grown much larger for stock feeding. This sort keeps well for so early a variety and is one of the best for market use. Sometimes known as Red top White Globe. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb.; 65c per lb. in 10-lb. lots.

Above prices prepaid by parcel post or express.

I handle thousands of pounds of turnip seeds and offer of the best seeds. I have these grown by one of the leading European specialists, and after fully testing them compared with others, I recommend them as of the best.

Every person who plants a garden or field should grow some turnips.

For early use drill in rows or sow broadcast very early in the spring. For winter use sow in July or August broadcast and harrow in the seed.

Be careful not to get them too thick, as this results in all top and no turnip. One pound of seed is sufficient for an acre.

For winter use store in a cool cellar and cover with sand or silo them in the field by covering with earth, then a layer of straw, then more earth of sufficient depth to keep from freezing. When first siloed leave a small open space on the top covered with straw until cold weather, to prevent heating. When cold, freezing weather comes cover this.

WHITE EGG belongs to the class of quick-growing fall turnips, and for this purpose should be sown August 10th in this latitude; a favorite with market growers for winter and early spring sales. Its shape is nearly that of an egg; very fine sort. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 75c per lb.; 65c per lb. in 10-lb. lots.

PURPLE TOP STRAP LEAVED. The most widely cultivated and best-known variety. Used

The Following Varieties of FLOWER SEEDS Are Most Commonly Grown and of Good Quality

ASTERS

These beautiful Autumn Annuals are easily grown. I offer a number of varieties as follows:

SEMPLE'S BRANCHING ASTERS. Large, full-petaled flowers, separate colors. White, Pink, Crimson, Purple, Light Blue, and also mixed colors. Price—10c per pkt.; 50c per $\frac{1}{4}$ oz.

CREGO'S GIANT ASTERS. Large flowers, narrow petals curved back. Separate colors, White, Rose, Crimson and Purple, also mixed colors. Price—15c per pkt.; 25c per $\frac{1}{4}$ oz.

MIKADO PINK (Rochester) ASTERS. Beautiful, large flower. Light rose with lavender tint. Petals curved and twisted. Price—15c per pkt.; 40c per $\frac{1}{4}$ oz.

PEERLESS PINK ASTERS. Large delicate pink flowers. Price—5c per pkt.; 45c per $\frac{1}{4}$ oz.

TRUFFONT'S PERFECTION PEONY-FLOWERED ASTERS. Large bell-shaped flowers, many shades, mixed. Price—10c per pkt.; 35c per $\frac{1}{4}$ oz.

GIANT COMET ASTERS. Large flowers, petals long, narrow, curved and twisted. Very fine. Price—White, 15c per pkt.; 45c per $\frac{1}{4}$ oz.; mixed, 15c per pkt.; 45c per $\frac{1}{4}$ oz.

SWEET ALYSSUM (Little Gem.) Small, fragrant annual; makes a beautiful border. Price—5c per pkt.

ANTIRRHINUM (Snap Dragon). This beautiful flower is easily grown. Sow seed early in spring. My stock is of the finest, I grow acres of these flowers for seed. Price—10c per pkt.

CANDYTUFT (New Empress). Large white heads or blooms, resembles the hyacinth. Easily grown; sow early in spring. Price—10c per pkt.

CANDYTUFT (Mixed). Valuable for borders. Price—5c per pkt.; 20c per oz.

BALSAMS (Lady Slipper) Double Camelia Flowered. Large flowers of beautiful, delicate colors. Price—5c per pkt.; 40c per oz.

CANARY BIRD VINE. A beautiful, rapid-growing annual climber. Price—5c per pkt.

CANNA (Crozy's Dwarf Mixed). Dwarf plants, luxurious growth. Large Gladiolus-like flowers. Price—10c per pkt.

CENTAUREA (Sweet Sultan). Very beautiful, fragrant flowers, early bloomers and valuable for cutting. Seed either Mixed Colors or White. Price—10c per pkt.

CYPRESS VINE (Finest Mixed). Beautiful climber. Grows six feet or more high. Foliage is delicate, fern-like. Price—10c per pkt.

FLOWER SEED—Continued

Cosmos

EARLY FLOWERING MIXED. A favorite fall flower. This early flowering strain may be had in bloom from July to November. Plants are such strong, vigorous growers and so free with their favors, they can scarcely be spared from any garden. Splendid for bouquets. Height 4 to 6 feet. **Price—5c per pkt.**

DIANTHUS (Double Mixed). Few flowers can equal these in beauty and profusion of bloom. For a garden decoration they are one of the most satisfactory annuals. The combination of colors is almost endless. **Price—5c per pkt.**

DAHLIA (Double Cactus Mixed). A distinct and elegant variety. Unequaled for its rich and varied colors and perfection of bloom. Dahlias are easily grown from seed and bloom the first season. Seed sown in the house in March and April will produce flowering plants as soon as those grown from tubers, and no two plants will be alike in flower. **Price—10c per pkt.**

Daisy

SHASTA. One of Luther Burbank's hybrids, the result of a cross between the common field daisy and a European sort. It is a hardy perennial, bearing large, graceful flowers of the purest whiteness, averaging about 4 inches in diameter. **Price—10c per pkt.**

ESCHSCHOLTZIA California Poppy

Glory of the West. Summer flowering annuals of low, spreading growth, delicate foliage and golden yellow flower. Splendid for bedding. Very showy and free flowering. **Price—5c per pkt.**

GAILLARDIA

Blanket Flower
Fine Mixed. Beautiful annuals for the flower garden, producing showy plants 1 to 2 feet high, which bloom continuously from early summer until November. Thrives well everywhere. Very effectively grown in masses. Excellent for cutting. **Price—5c per pkt.**

Geranium

ZONALE MIXED. An excellent mixture of the largest and finest varieties. Geraniums are very interesting plants to raise from seed, as there is always a chance of securing something new and desirable: in fact, propagation by seed is the only way to obtain new varieties. **Price—10c per pkt.**

Larkspur

EMPEROR, MIXED. A well-known annual of great beauty. As they are not easily transplanted, sow the seed where the plants are wanted. **Price—5c per pkt.**

PHLOX

DRUMMONDII GRANDIFLORA. Flowers nearly twice as large as the ordinary Phlox Drummondii, while the colors are richer and brighter. For beds, borders and massing it is unsurpassed. **Price—5c per pkt.**

PORTULACA

Rose Moss

DOUBLE MIXED. There are scarcely any flowers in cultivation which make such a dazzling display of beauty as a bed of many-hued portulacas. Blooms from July until frost. **Price—10c per pkt.**

PANSY

GIANT TRIMARDEAU MIXED. The largest flowering of all pansies. To succeed with pansies only the best seed should be sown. Have the bed where it will not receive the full heat of the sun—the east and north side of the house is generally a good location. **Price—10c per pkt.**

POPPY

PEONY FLOWERED, MIXED. Large double, showy flowers, almost equal to peonies. Poppies are of quick growth and produce a wealth of the most gorgeous blooms. Seed should be sown early where they are to bloom and covered lightly; thin to six inches apart. Do well in any good garden soil. **Price—5c per pkt.**

ZINNIAS

I am **Headquarters** for Zinnia seed and urge you to plant these liberally for borders or for bedding.

These flowers are so easily grown and the newest selections so beautifully colored and so nearly perfect in form that they rival the dahlia and aster for beauty.

From a Photo of One of My Zinnia Fields. See also inside back cover.

BURRELL'S SUPERB MIXED. This mixture of Giant Flowered Zinnia is the best I have ever seen. It is grown from the seed from the very finest flowers of White, Crimson and Yellow. Very carefully selected from fields of straight colors, then mixed and grown as a mixture. This gives the liveliest colors possible, which rival the finest Asters or Dahlias. Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.05 per $\frac{1}{2}$ oz.; \$2.00 per oz.

BURRELL'S TALL ROBUSTA GRANDIFLORA, MIXED. Very large flowers. All colors known to Zinnias. Price—10c per pkt.; 35c per $\frac{1}{4}$ oz.; \$1.10 per oz.

BURRELL'S EXTRA SELECTED BLACK KNIGHT ZINNIAS. One of the leading flower seedsmen of England, when he saw my crop of this variety stated that he would take pride in exhibiting such a flower at the leading flower shows. The flowers are about two and one-half inches in diameter, very deep red, and the flowers often three inches deep when fully grown. I recommend this sort highly. Price—Pkt., 20c; $\frac{1}{4}$ oz., 75c; $\frac{1}{2}$ oz., \$1.35; 1 oz., \$2.50.

BURRELL'S SPECIAL MIXTURE ELEGANS, DOUBLE MIXED. This selection contains the whole range of colors known to Zinnias. Price—Pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c.

ELEGANS DWARF MIXED. The plants grow two to three feet tall and a very large number of colors are produced. The flowers are quite double and two to three inches in diameter. Price—Pkt., 5c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c.

BURRELL'S GIANT PURPLE ZINNIA. These flowers are very large and double. An extra good selection. Price—10c per pkt.; 60c per oz.

SCARLET LARGE-FLOWERED ZINNIA. These flowers are very uniform in color and make handsome beds. Price—Pkt., 10c; oz., 45c.

ZINNIAS, STRIPED OR ZEBRA-FLOWERED. These flowers are produced abundantly in all colors and each flower is striped like a zebra. Price—Pkt., 10c; oz., 40c.

BURRELL'S SPECIAL CURLED AND CRESTED ZINNIA. These flowers are produced in all colors and the long, narrow petals are curled. This special mixture contains a large per cent of soft, light colors and for a border they can hardly be surpassed. Price—Pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 65c.

BURRELL'S SPECIAL POMPONE ZINNIA. This mixture of all Zinnia colors grows about two and one-half feet tall. The flowers are only about an inch in diameter. They are very pretty and many think them the finest type of Zinnias. Price—Pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 65c.

General List of Flower Seeds

Alyssum, Little Gem. See page 60.

Amaranthus, Tricolor. (Joseph's Coat.) Showy annual foliage plant; leaves red, yellow and green. Height 3 feet. Price—5c per pkt.

Antirrhinum. (Snapdragon.) Giant Flowering Mixed. See page 60.

Aguilegia (Columbine.) A hardy perennial. Single Mixed. Price—5c per pkt.

Asters. Beautiful autumn flowers, considered by many the finest flowers. See page 60.

Asparagus Fern Sprengerii. Fine plant for pot culture or hanging basket. Price—10c per pkt.

Bachelor's Button. A showy annual; great variety of colors. Price—5c per pkt.

Balloon Vine. (Love in a Puff.) Rapid growing annual climber; white flowers, followed by balloon-like seed pods. Price—5c per pkt.

Balsam, Double Camellia Flowered. See page 60.

Calliopsis. Showy garden annual; golden yellow flowers; choicest mixture. Price—5c per pkt.

Canary Bird Vine. See page 60.

Candytuft. See page 60.

Canna, Crozy's Dwarf. See page 60.

Carnation, Choice Double Mixed. Produces many double flowers of all shades and colors. Price—10c per pkt.

Centurea, Imperialis Mixed. See page 60.

Celosia Cristata. (Cockscomb.) Tall sorts, mixed. Price—5c per pkt.

Clematis, Paniculata. One of the finest hardy climbers. Fragrant white flowers. Price—5c per pkt.

Coix Lachryma. (Job's Tears.) Curious ornamental grass from East India with broad corn-like leaves, and seeds of a light slate color, wonderfully lustrous. Valuable for winter bouquets. Price—5c per pkt.

Convolvulus. (Morning Glory.) Major. All colors mixed. Price—5c per pkt.

Cosmos, Early Flowering, Mixed. See page 61.

Chrysanthemum, Annual Varieties Mixed. Price—5c per pkt.

Perennial Varieties Mixed. Price—10c per pkt.

Cypress Vine. See page 60.

Dahlia, Double Cactus Mixed. See page 61.

Daisy, Shasta. See page 61.

Dianthus, Double Mixed. See page 61.

Snow Queen. Beautiful snow white variety of pinks. Prices—10c per pkt.

Digitalis. (Foxglove.) Flowers borne in tall spikes, bell or thimble shaped. All colors. Price—5c per pkt.

Dolichos. (Hyacinth Bean.) Desirable climbing plant. Mixed colors. Price—5c per pkt.

Eschscholtzia. (California poppies.) See page 61.

Fuchsia, Double, Finest Mixed. Easily grown from seed. Price—25c per pkt.

Gaillardia. See page 61.

Geranium, Zonale Mixed. See page 61.

Gilia. Mixed colors. Hardly annual. Among the earliest to flower and will keep long in water. Flowers grow in clusters. Price—5c per pkt.

Gypsophila. (Baby's Breath, or Angel's Breath.) Elegant. Charming for mixing with bouquets. Star-shaped white flowers. Price—5c per pkt.

Heliotrope, Fine Mixed. Very fragrant, excellent for bedding or indoor culture. Price—5c per pkt.

Hollyhock, Double Mixed, Best. The flowers are as double as a rose and of many shades of color. Once started they keep coming year after year. Price—10c per pkt.

Double Mixed, Good. Price 5c per pkt.

Ipomoea. (Moon Flowers, Brazilian Morning Glories.) New Hybrid climbers of very rapid growth, with many beautiful and varied flowers. Price—10c per pkt.

Lantana, Finest Mixed. Tender perennial. Excellent for bedding or pot culture. Price—5c per pkt.

Larkspur, Emperor Mixed. See page 61.

Lobelia, Finest Mixed. Price—5c per pkt.

Marigold, African Mixed. Of easy cultivation, producing an elegant display of perfectly double orange-yellow and brown flowers. Height 3 feet. Price—5c per pkt.

Marvel of Peru, 4 O'Clocks, Mixed. Price—5c per pkt.

Matricaria (Feverfew.) Capensis, double white. Will bloom first season with seed. Perennial. Price—5c per pkt.

Mignonette, Giant Matchet. Very fragrant. Price—10c per pkt.

Verbena, Mammoth Mixed. Price—5c per pkt.

Violets. Single Blue. Price—5c per pkt.

Shirly Poppy

This beautiful variety produces through a long season large single flowers of charming delicacy. The colors are of wide range—from pure white through the softest shades of pink and rose to brightest scarlet and carmine red. The petals are very thin. Some crumpled like tissue paper, others like fine silk. About 20 inches high. Plant very early. Hardy annual. **Price—5c per pkt.; 25c per oz.**

SWEET PEAS

SPENCER VARIETIES

APPLE BLOSSOM SPENCER. Bright rose standard with wings of light primrose tinted rose carmine. A very large, free blooming sort. **Price—pkt., 10c; oz., 35c; ¼ lb., \$1.00.**

Grandiflora Sweet Peas

THE OLDER TYPE OF SWEET PEAS

BURRELL'S SPECIAL MIXTURE, GRANDIFLORA, consisting of a large number of varieties carefully mixed to give the best colors. **Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00; 5 lbs., \$4.00.**

WILD FLOWER GARDEN. This mixture contains a large number of varieties suitable for planting very early in the spring. The many colors and shapes result in a very attractive bed. **Price—10c per pkt.; 30c per oz.**

Burrell's Special Zinnias

Giant Flowered

I have carefully selected the following to large flowers from 4 to 5 inches across of the type illustrated from a photograph shown above.

I have excellent selections in separate colors as listed below. The Crimson and Canary Yellow, planted in alternate rows, give a very pleasing effect. You will surely be well pleased with these.

Burrell's Giant Crimson Zinnia

Flowers 4 to 6 inches in diameter and of such glowing color that they are very attractive even from a long distance. The long, soft petals form so well-shaped flowers that they rival the finest Dahlias. Price, pkt., 10c; $\frac{1}{8}$ oz., 30c; $\frac{1}{4}$ oz., 55c; $\frac{1}{2}$ oz., \$1.05; 1 oz., \$2.00.

Burrell's Giant Canary Yellow Zinnia

Large flowers; long, soft petals. A very fine flower. Price, pkt., 10c; $\frac{1}{8}$ oz., 30c; $\frac{1}{4}$ oz., 55c; $\frac{1}{2}$ oz., \$1.05; 1 oz., \$2.00.

Burrell's Giant Violet Zinnia

An excellent flower; same type as above sorts. Price, 10c per pkt.; $\frac{1}{8}$ oz., 30c; $\frac{1}{4}$ oz., 55c; $\frac{1}{2}$ oz., \$1.05; 1 oz., \$2.00.

Burrell's Superb Mixture of Giant Flowered Zinnia

These were grown this year as a mixture. I took seed of Burrell's Giant Crimson, Canary Yellow and White and mixed about one-third of each. This resulted in the finest mixture of Zinnias I have ever seen. The colors were so bright and lively. From the lot you will also get other colors resulting from the crossing of above colors. I hope every one of my customers will plant some of this seed. You will get far finer flowers than was thought possible from Zinnias a few years ago. Price, 10c per pkt.; $\frac{1}{8}$ oz., 30c; $\frac{1}{4}$ oz., 55c; $\frac{1}{2}$ oz., \$1.05; 1 oz., \$2.00.

D. V. BURRELL SEED GROWER
ROCKY FORD, COLO.

THE following Special Varieties are of such great merit that every order should include them. Nothing better for the home or market garden.

Burrell's Earliest of All Cucumber

Nearly 25,000 pounds already sold for 1921 planting.

This Extra Early Cucumber produces a heavy crop of evenly shaped, dark green fruits, earlier than any other good sort. Market growers make big money by planting Burrell's Earliest of All Cucumber. Price—Pkts., 5c; 10c per oz.; 30c per $\frac{1}{4}$ lb., \$1.00 per lb.; 85c per lb. in 10-lb. lots; 75c per lb. in 100-lb. lots.

Burrell's Improved Kleckley Sweet Watermelon

The finest melon grown for home use or nearby markets.

This excellent selection of the Kleckley Sweet is well known throughout the country. Thousands plant it each year and I am usually compelled to refuse many orders. See description inside catalog. Price, Stock Seed, 20c per pkt.; 40c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$5.00 per lb., prepaid. No order over five lbs.

Burrell's Select Early Jewel Tomato

Very early, large, smooth, red sort. A money maker for market growers. None better for the home garden.

I have been carefully selecting this seed for a number of years. This is all line bred stock. I do not believe a better selection can be purchased. An ounce of seed will produce enough plants, under favorable conditions, to grow an acre of tomatoes. Price, 10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz., prepaid.
